# 0 Curriculum and Teaching and Examination Languages

# The teaching and examination language is German, except in the following subjects where it is English:

- Business English
- Intercultural Communication
- Introduction to International Management
- Specialisation International Management (Rheinbach Campus)
- Specialisation International Financial Management (Sankt Augustin Campus)
- Specialisation Marketing, especially Business to Business (Sankt Augustin Campus)

Department of Management Sciences Rheinbach Campus

### 1 1st Semester Modules

- Pre-courses (before the beginning of the 1st Semester)
- Principles of Psychology 1
- Principles of Psychology 2
- Methodology 1
- Business & Economic Sciences 1
- Business & Economic Sciences 2

# 1.1 Pre-courses (before the beginning of the 1st Semester)

#### Title of the Module

Pre-courses (before the beginning of the 1st Semester)

Module Number	Workload	Credits	Study Se-	Frequency	Duration
Number	N/A	0	mester 1st semester	Every semester	1 semester
1.1					
Course(s)		•	Contact Time	Self-Study	Planned Group Size
Mathematics			2 SWS/30 h	N/A	70 students
Psychology			1 SWS/15 h		70 students

#### **Learning Outcomes**

#### **Mathematics**

The mathematics bridging course enables students to refresh their knowledge of mathematics. They can make targeted use of this knowledge during their degree and develop it further.

#### **Psychology**

Students can define and distinguish between the sub-disciplines of psychology. They can explain why a scientific approach is highly important for making new findings in the field of psychology. They can describe the issues relating to the fundamental disciplines of psychology, methodology and business psychology and can link them to a practical context.

#### **Topics**

#### **Mathematics**

- Number systems and basic arithmetic operations
- Summations
- Powers
- Logarithms
- Roots
- Linear equations and equation systems
- Higher equations and inequations
- Functions
- Principles of differential calculus
- Curve sketching

#### **Psychology**

- Overview and brief definition of the different areas of psychology
- Psychology as a science
- Introduction to the basic subjects of psychology
- Introduction to the methods of psychology
- Introduction to the fields of business psychology

#### **Forms of Teaching**

Seminars and practical classes.

Department of Management Sciences Rheinbach Campus

**Requirements for Participation** 

None

Form(s) of Examination

N/A

**Requirements for Awarding Credit Points** 

N/A

**Use of the Module** (in other degree programmes)

The pre-course "Mathematics" is also part of the degree programme "Business Management"

**Weighted Factor for the Final Grade** 

N/A

**Module Coordinator (underlined) and Full-Time Lecturers** 

Prof. Dr. C. Buchholz, Dr. T. Krickhahn (lecturer with special duties (LfbA)), A. Ley

# 1.2 Principles of Psychology 1: General Psychology 1, Social Psychology 1

Title of the Mo	Title of the Module								
Principles of Psyc	Principles of Psychology 1								
Module Num- ber	Workload	Credits	Study Se- mester Frequency Every semester		Duration				
1.2	180 h	6	1st semester		1 semester				
Course(s)			Contact Time	Self-Study	Planned Group Size				
General Psychology 1 Social Psychology 1			3 SWS/45 h 2 SWS/30 h	75 h 30 h	70 students 70 students				

#### **Learning Outcomes**

#### **General Psychology 1**

Students can describe and categorise the physiological and psychological principles of human perception processes. They can explain the fundamental psychological knowledge in the fields of attention, thinking, problem-solving and decision-making and can differentiate between psychological hypotheses and theories on the one hand and empirical findings and research results on the other. Students can identify typical applications for general psychological knowledge from the fields of perception, attention, thinking, problem-solving and decision-making. By carrying out demonstration experiments, students acquire the skills to formulate psychological questions and to observe, describe and analyse the results in precise detail with regard to a particular hypothesis or theory. By working with typical human errors in perception and reasoning, they can identify the limitations of their own ability to process information and put into perspective their own thought and perception processes.

#### Social Psychology 1

Students can analyse different processes in the context of social perception/cognition and decisionmaking. This enables them to avoid making incorrect decisions in a business setting. They are able to identify and describe the important influencing factors of attitudes and schemata on human behaviour. In addition, they can analyse developments and changes in attitudes. Students can explain the mechanisms for the development of prejudices and discrimination and describe methods of measuring and reducing prejudices, with an emphasis on intercultural factors. Students can describe the factors that explain human attraction.

#### **Topics**

#### **General Psychology 1**

- Physiological and psychological principles of visual, acoustic, tactile, olfactory and gustatory perception
- Theories and findings relating to attention processes
- Theories and findings relating to human problem-solving
- Theories and findings relating to the psychology of thought
- Brief introduction to the psychology of decision-making

#### **Social Psychology 1**

Social perception/cognition

Department of Management Sciences Rheinbach Campus

- Judgement and decision-making
- Attitudes and behaviour
- Prejudices and discrimination
- Human attraction

#### Forms of Teaching

Seminars, demonstration experiments (including online evaluation), lectures, group discussions, group work, presentations, question sessions, role plays, case studies, self-study, online questioning methods.

#### **Requirements for Participation**

None

#### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

**Use of the Module** (in other degree programmes)

Not planned.

#### **Weighted Factor for the Final Grade**

4%

#### Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. C. Massen, M. Dietzsch

# 1.3 Principles of Psychology 2: **Developmental Psychology, Differential Psychology 1**

Title of the Mo	Title of the Module								
Principles of Psyc	Principles of Psychology 2								
Module Num- ber	Workload	Credits	Study Se- mester	Frequency Every semester	Duration				
1.3	180	6	1st semester		1 semester				
Course(s)		1	Contact Time	Self-Study	Planned Group Size				
Developmental Psychology Differential Psychology 1			3 SWS/45 h 2 SWS/30 h	75 h 30 h	70 students 70 students				

#### **Learning Outcomes**

#### **Developmental Psychology**

Students can divide human development into different stages and describe the relevant development processes in these stages. They can distinguish between cognitive, emotional and social development processes. In addition, they are able to differentiate between a successful adaptation to the different phases of life and potential atypical developments. On the basis of their understanding of the typical features and themes of each phase of development, they can predict possible differences in the experience and behaviour of people in the different development phases, taking into account cohort effects (e.g. the impact of digitalisation). Students' understanding of the developmental differences between people allows them to assess possible effects in the context of business psychology and to take the effects into consideration.

#### **Differential Psychology 1**

Students are able to explain the development and the paradigms of differential psychology. They will learn to describe fundamental problems (e.g. trans-situational inconsistency). They can explain methods for identifying personality traits and apply individual stages of the methods themselves (e.g. interpreting the results of a factor analysis). Students can explain different approaches to describing the personality (prototypes, traits). They are able to identify and describe personality constructs and highlight their importance (e.g. for career success). Students become familiar with methods for measuring the personality and can interpret the results. They can also assess the quality of measurement instruments using quality criteria. In addition, they can design studies to investigate the quality of measurement instruments. They are able to critically evaluate an application of personality psychology (personality tests in staff recruitment).

#### **Topics**

#### **Developmental Psychology**

- Theories and findings concerning development in childhood and adolescence
- Theories and findings concerning development in young adulthood
- Theories and findings concerning development in middle adulthood
- Theories and findings concerning development in late adulthood
- Reading articles from professional journals

#### **Differential Psychology 1**

- Historical development of differential psychology
- Empirical analysis of personality (e.g. measuring personality traits)
- Methods of identifying personality traits (e.g. lexical approach)
- Models for describing personality traits
- Conducting and evaluating a personality inventory

#### Forms of Teaching

Seminars, demonstration experiments, lectures, group discussions, group work, presentations, question sessions, role plays, case studies, self-study.

#### **Requirements for Participation**

None

#### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

**Use of the Module** (in other degree programmes)

Not planned.

#### **Weighted Factor for the Final Grade**

4%

# 1.4 Methodology 1: **Business Mathematics, Research Methods**

Title of the Module								
Methodology 1	Methodology 1							
Module Num- ber	Workload	Credits	Study Se- mester	Frequency Every semester	Duration			
1.4	180	6	1st semester		1 semester			
Course(s)			Contact Time	Self-Study	Planned Group Size			
Business Mathen	natics		2 SWS/30 h	30 h	70 students			
Research Method	ds		3 SWS/45 h	75 h	70 students			

#### **Learning Outcomes**

#### **Business Mathematics**

Students develop the capability to describe economic problems from the fields of business planning, management and controlling in mathematical terms and to analyse and, if necessary, resolve the problems. Furthermore, they learn which mathematical tools to use in specific circumstances in a practical business context. By learning the correct methods of collecting and processing data and of problem-based analysis and meaningful linking of data, students are prepared for making business decisions.

#### **Research Methods**

Students can identify the goals and the fundamental process of empirical psychology and explain the basic difference between qualitative and quantitative research approaches. They are able to describe typical quantitative and qualitative methods of data collection and evaluation and to analyse the respective advantages and disadvantages. They are capable of finding a suitable qualitative or quantitative research approach to a business psychology research question and can select an appropriate method of data collection and evaluation. Students can then justify this selection on the basis of suitable criteria. Furthermore, they are able to assess different research approaches with regard to their meaningfulness, e.g. in relation to permitted causal conclusions or the three quality criteria of validity, reliability and objectivity, and to apply this knowledge to evaluate scientific literature on the subject of business psychology.

#### **Topics**

#### **Business Mathematics**

- Introduction to the principles and structures of business mathematics
- Fundamental principles and properties of (economic) functions and equation systems
- Differential calculus, elasticities
- Equation systems, matrices, linear optimisation methods, simplex
- Introduction to financial mathematics

#### **Research Methods**

- Scientific principles of psychology
- Quantitative research approaches
- Quantitative data collection methods

Department of Management Sciences Rheinbach Campus

- Quantitative evaluation methods
- Qualitative research approaches
- Qualitative data collection methods
- Qualitative evaluation methods
- Ethical aspects of dealing with test subjects and research data

#### **Forms of Teaching**

#### **Business Mathematics**

Seminars with integrated individual/group work.

#### **Research Methods**

Seminars, practical classes, lectures, group work, presentations, question sessions, self-study, video tutorials, empirical studies.

#### **Requirements for Participation**

Formal: None

**Content:** Knowledge of mathematics at upper secondary school or commercial college level in Germany.

#### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

Not planned.

#### **Weighted Factor for the Final Grade**

4%

#### **Module Coordinator (underlined) and Full-Time Lecturers**

Prof. Dr. C. Massen

2 SWS/30 h

1 SWS/15 h

30 h

15 h

70 students

70 students

#### **Learning Outcomes**

Principles of Marketing

Title of the Module

#### **Principles of Business Administration**

Introduction to International Management

Students learn about generally applicable business administration tools/techniques (e.g. problem, system and benefit analysis) and, as a result, are able to identify the structures and processes in a business and to link them together in an integrated way. The module focuses on the ability to process business decision-making problems systematically and transparently.

#### **Principles of Marketing**

Students can describe marketing problems and identify appropriate solutions for marketing on a national and international level. The focus is on the ability to select different marketing instruments in accordance with customers' requirements. Students are made particularly aware of the challenges of international marketing.

#### **Introduction to International Management**

Students acquire theoretical and practical knowledge of international management. They are familiar with important factors of globalisation and can analyse international markets. They can describe the management functions of global companies and formulate market entry strategies. Students can identify the cultural problems of international business management and can describe the problems and explain them using practical examples.

#### **Topics**

#### **Principles of Business Administration**

- What does business administration involve?
- Categorising business administration as a science; history of business administration
- Scientific concept of business administration as a business theory; methodologies in business administration; objectives of economic activity in business administration
- Location decisions, selection criteria, internationalisation
- Decisions on legal form, fundamental issues, description and comparison of the different legal forms, special applications and new models
- Collaboration and cooperation between businesses case study on the subject of cooperation between companies

Department of Management Sciences Rheinbach Campus

- Corporate legal structure, modern concept of democracy in companies, comparison of state and business
- Corporate governance
- Controlling and controlling instruments
- Organisation
- Entrepreneurship

#### **Principles of Marketing**

- Strategies in marketing
- Consumer behaviour
- Market analysis
- Product policy
- Pricing policy
- Distribution policy
- Communication policy
- International aspects of marketing

#### **Introduction to International Management**

- Globalisation: important factors, advantages and disadvantages, key players
- Analysis of national markets and the business environment: economic and cultural profiles of the target country, evaluation of national markets and other forms of country risks, barriers to market entry and evaluation of the market attractiveness of the target country
- International trade and investment: theoretical principles, e.g. absolute and comparative cost advantages, foreign direct investment, facts and figures
- International market entry and market development strategies
- Development of international product and marketing strategies: expansion and adaptation strategies
- Dynamics of global CSR and sustainability strategies

#### Forms of Teaching

Seminars, project and/or group work, presentations.

Introduction to International Management additionally: independent research into international companies, preparation of internationalisation strategies.

#### **Requirements for Participation**

None

#### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

Not planned.

#### **Weighted Factor for the Final Grade**

4%

Department of Management Sciences Rheinbach Campus

# 1.6 Business & Economic Sciences 2: Principles of Organisation, Principles of Human Resource Management

Business & Econo	Business & Economic Sciences 2							
Module Num- ber	Workload Credits		mester	Frequency Every semester	Duration			
1.6	180	6	1st semester		1 semester			
Course(s)			Contact Time	Self-Study	Planned Group Size			
Principles of Org	anisation		2 SWS/30 h	60 h	70 students			
Principles of Hun	nan Resource M	anagement	3 SWS/45 h	45 h	70 students			

#### **Learning Outcomes**

**Title of the Module** 

#### **Principles of Organisation**

Students become familiar with organisational design alternatives and practical influencing factors and success factors. In addition, they gain insights into approaches to organisational theory. On the basis of classical concepts and more recent developments in organisational theory, students are able to develop their own solutions to organisational issues and to make organisational decisions systematically and transparently.

#### **Principles of Human Resource Management**

Students learn the principles of human resource management in the context of approaches to corporate policy and social changes. They are given the skills to identify and help shape fundamental human resource functions within the business as an important part of management and to define them in the context of human resource management. They are also capable of assessing the possibilities, limits and uses of the human resource management methods with regard to current and future developments. Students also learn that the use of these concepts/instruments in similar industries/companies can have conflicting effects because of business micropolitics.

#### **Topics**

#### **Principles of Organisation**

- Introduction to and principles of organisational theory
- Selected approaches to organisational theory (classical concepts and more recent developments)
- Concepts and practical solutions for structural organisation
- Concepts and practical solutions for process organisation
- Management of organisational change
- Perspectives on recent requirements in organisational design and current problems (e.g. stress, diversity, technological developments relating to digitalisation)

#### **Principles of Human Resource Management**

- Business policy and human resource planning
- Recruitment (human resource marketing, recruitment, selection)
- Staff retention (retention management, onboarding) and staff development

Department of Management Sciences Rheinbach Campus

- Human resource controlling and organisation of human resource management
- Principles of leadership
- Specific features of international human resource management
- Case studies and selected challenges (e.g. globalisation, CSR, AI and Industry 4.0)

#### **Forms of Teaching**

#### **Principles of Organisation**

Seminars, evaluating case studies and developing solutions, individual work, group work.

#### **Principles of Human Resource Management**

Seminars, practical classes, handouts, work with case studies.

#### **Requirements for Participation**

None

#### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

**Use of the Module** (in other degree programmes)

Not planned.

#### **Weighted Factor for the Final Grade**

4%

#### Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. H. Meier

### 2 2nd Semester Modules

- Principles of Scientific Writing & Presenting
- Principles of Psychology 3
- Methodology 2
- Foreign Business Language

# 2.1 Principles of Scientific Writing & Presenting: Rhetoric & Presentation Skills, Principles of Scientific Writing

Title of the Module									
Principles of Scie	Principles of Scientific Writing & Presenting								
Module Num- Workload Credits ber		Study Se- mester	Frequency Every semester	Duration					
2.1	180	6	2nd semester		1 semester				
Course(s)	•	•	Contact Time	Self-Study	Planned Group Size				
Rhetoric & Presentation Skills			2 SWS/30 h	60 h	24 students				

#### **Learning Outcomes**

#### **Rhetoric & Presentation Skills**

Principles of Scientific Writing

Students develop and consolidate their rhetorical skills. They can give persuasive speeches and presentations, in terms of structure, body language, vocabulary and self-assessment, and give and receive feedback in a group.

2 SWS/30 h

60 h

35 students

#### **Principles of Scientific Writing**

Students learn to gain a rapid and comprehensive understanding of the status of the debate in a specialist field. They can deal with the scientific views of others responsibly. In addition, they can conduct focused research on a topic using a wide variety of sources and assemble scientific information in written compositions (e.g. assignments, practical project reports, Bachelor's theses).

#### **Topics**

#### **Rhetoric & Presentation Skills**

- Structure and composition of persuasive speeches and presentations
- Basic concepts and influencing factors
- Visualisation and use of media
- Memory and learning techniques
- (Body) language and voice
- Tutorials on brief ad-lib speeches

#### **Principles of Scientific Writing**

- Introduction to scientific methods of working and thinking
- Topic selection and reflection
- Literature research
- Arguments/thematic structure
- Citation methods
- Writing style and language

#### Forms of Teaching

Introductions from lecturers, group work, presentations.

#### **Requirements for Participation**

Department of Management Sciences Rheinbach Campus

None

#### Form(s) of Examination

An examination graded as "passed" or "failed". More details in section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

Not planned.

#### Weighted Factor for the Final Grade

N/A

#### **Module Coordinator (underlined) and Full-Time Lecturers**

F. Maikranz (lecturer with special duties (LfbA))

# 2.2 Principles of Psychology 3: General Psychology 2, Social Psychology 2, Differential Psychology 2

Title of the Mo	Title of the Module							
Principles of Psyc	Principles of Psychology 3							
Module Num-	Workload	Credits	Study Se-	Frequency	Duration			
ber			mester	Every semester				
	240 h	8	2nd semester		1 semester			
2.2								
Course(s)			Contact Time	Self-Study	Planned Group Size			
General Psycholo	ogy 2		3 SWS/45 h	75 h	70 students			
Social Psychology	y 2		2 SWS/30 h	30 h	70 students			
Differential Psych	nology 2		2 SWS/30 h	30 h	70 students			

#### **Learning Outcomes**

#### **General Psychology 2**

Students can describe the fundamental forms of human learning such as classical and operant conditioning, implicit learning and observational learning and can explain the accompanying theories, findings and applications. They are also familiar with the fundamental structure of the human memory and can substantiate this on the basis of empirical findings. They can name the main influencing factors on the memory and apply them to their own learning situation on the degree course. By working with typical memory errors, they can gain a perspective on their own information processing methods. In addition, they can describe the components of human emotions and explain how they can be measured. They are able to explain different models for the development of human emotion and to discuss them on the basis of scientific findings. Moreover, they can describe the functions and effects of human emotions and identify efficient emotion regulation strategies. They are capable of explaining basic situational and personal factors and constructs of human motivation and volition (e.g. implicit vs explicit motives) and of describing the relevant findings. By working independently with application-oriented research articles and subsequently discussing them, students learn to put theories of general psychology into practice. In doing so, they also acquire the competence to critically evaluate the opportunities and the limits of individual empirical findings.

#### Social Psychology 2

Students are able to describe influencing factors on both prosocial and aggressive behaviour and to analyse them in practice. This enables them to explain the methods that can be used to increase prosocial behaviour and prevent violence. They can analyse processes of group formation and intergroup discrimination and describe methods for improving relationships between groups. Students are familiar with the positive and negative characteristics of groups and are able to analyse social influence mechanisms. They are able to identify communication patterns and to apply communication improvement methods (including intercultural communication).

#### **Differential Psychology 2**

Students gain a deeper understanding of personality dimensions and can differentiate between different personality constructs. They acquire an understanding of the construct of intelligence. They can describe the factors that influence the development of the personality and explain the interaction between genes and environmental factors. They learn how to measure and describe environmental

influences. They are able to describe the differences between the genders and to evaluate their practical relevance. Furthermore, students acquire the ability to read and understand articles in journals of personality psychology and to apply the findings to different questions. They learn to apply their knowledge of personality traits to professional challenges and skills. They can differentiate between and compare various common personality tests.

#### **Topics**

#### **General Psychology 2**

- Learning and behaviour
- Memory
- Emotion
- Motivation

#### **Social Psychology 2**

- Prosocial behaviour
- Aggression
- Group processes
- Social influence
- Communication

#### **Differential Psychology 2**

- · Personality traits
- Intelligence
- Self-related cognition
- Environmental and relational influence
- Gender differences
- Insights into personality development
- Applications of differential psychology

#### **Forms of Teaching**

Seminars, demonstration experiments (including online evaluation), lectures, group discussions, group work, presentations, question sessions, role plays, case studies, self-study, online questioning methods.

#### **Requirements for Participation**

None

#### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

Not planned.

#### **Weighted Factor for the Final Grade**

5%

Department of Management Sciences Rheinbach Campus

# 2.3 Methodology 2: **Statistics 1, Test Theory and Diagnostics**

Title of the Module								
Methodology 2	Methodology 2							
Module Num- ber	Workload	Credits	Study Se- mester	Frequency Every semester	Duration			
2.3	330 h	11	2nd semester		1 semester			
Course(s)			Contact Time	Self-Study	Planned Group Size			
Statistics 1 Test Theory and Diagnostics			4 SWS/60 h 3 SWS/45 h	120 h 105 h	70 students 70 students			

#### **Learning Outcomes**

#### Statistics 1

Students are able to understand and analyse practical statistical questions and problems by using appropriate statistical methods and techniques and to develop statistical solutions for these problems. The focus is on the correct methods of collecting and processing data and on the problem-based analysis of data in the field of descriptive statistics. Furthermore, students are given an overview of contingency analyses and inferential statistical methods.

#### **Test Theory and Diagnostics**

Students are able to describe the connections in classical test theory and relate them to psychometric properties. They are familiar with all the steps in the test design process. They are able to explain, calculate and compare item codes and psychometric properties. Using appropriate statistical software, they can analyse and interpret calculated codes. This knowledge gives them the ability to interpret and evaluate the findings in primary scientific literature and to carry out a critical analysis of classical test theory. In addition, students are able to describe and explain the principles of diagnostics and to apply them to diagnostic questions. On the basis of this competence, students are able to evaluate, select, apply and interpret diagnostic procedures and psychometric tests in relation to different questions, especially staff recruitment.

#### **Topics**

#### Statistics 1

- Descriptive statistics
  - o Fundamental principles and concepts
  - Frequency distributions
  - o Averages and dispersion and concentration measures
  - Association and correlation measures
  - Regression analysis
- Probability calculation
- Inferential statistics (calculating confidence intervals, testing hypotheses)

#### **Test Theory and Diagnostics**

- Principles of measuring and testing
- Axioms of classical test theory

Department of Management Sciences Rheinbach Campus

- Design principles of psychometric tests
- Item analyses
- Psychometric properties
- Introduction to psychological diagnostics
- Examples of diagnostic procedures (performance tests, personality tests)

#### Forms of Teaching

#### Statistics 1

Seminars, projects and group work.

#### **Test Theory and Diagnostics**

Seminars, practical classes, data analyses, lectures, group discussions, group work, presentations, question sessions, self-study.

#### **Requirements for Participation**

Formal: None

**Content:** Knowledge of mathematics at upper secondary school level and the ability to understand the concepts of statistical methods and processes and their practical implementation.

#### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

Not planned.

#### **Weighted Factor for the Final Grade**

6%

#### **Module Coordinator (underlined) and Full-Time Lecturers**

# 2.4 Foreign Business Language: **Business English, Intercultural Communication**

Title of the Mo	Title of the Module							
Foreign Business	Foreign Business Language							
Module Num- ber	Workload	Credits	Study Se- mester	Frequency Every semester	Duration			
2.4	150 h	5	2nd semester		1 semester			
Course(s)			Contact Time	Self-Study	Planned Group Size			
Business English Intercultural Communication			3 SWS/30 h 2 SWS/30 h	60 h 30 h	18 students 18 students			

#### **Learning Outcomes**

#### **Business English**

Students are able to express themselves spontaneously and fluently in the spoken and written language without having to noticeably search for words. They can make flexible and effective use of the foreign language in social and professional life and express their thoughts and opinions accurately. They can also explain in detail more complex business issues, such as organisation, marketing, sales and finance, and link specific subjects together. Furthermore, they can write texts with a business content using correct formal language. Overall they are on level C1 of the Common European Framework of Reference for Languages (CEFR).

#### **Intercultural Communication**

Students can identify the cultural problems involved in cross-border business activities, in particular in transglobal situations. They can develop behavioural and communication strategies for intercultural critical incidents in an international context.

Students can develop their global intercultural competence. In particular, they can improve their ability to empathise, their perceptiveness, their culture-sensitive communication and their transnational cultural awareness. Students can increase their knowledge of international communication models (iceberg model; cultural dimensions of Hofstede, Hall, Trompenaars, Kluckhohn etc.) and learn how to apply these models in international business situations. The focus of the seminar is on the challenges of intercultural communication and the use of intercultural communication in international work settings. Students' theoretical knowledge will be increased with the help of case studies from an international business context and simulation games to raise their cultural awareness.

Students develop the ability to identify the causes of intercultural misunderstandings and gain a better overview of possible strategies for action, in particular in an international work environment.

#### **Topics**

#### **Business English**

- Acquisition and consolidation of foreign language skills (reading and listening comprehension, writing, speaking ability) for the independent use of language in business situations
- Improvement in the general ability to express oneself in the foreign language in specific professional contexts
- Development and consolidation of business vocabulary relating to various topics (e.g. company structure, finance, economic sustainability)

Department of Management Sciences Rheinbach Campus

- Aspects of diversity and culture in communication, social diversity
- Case studies on current business situations
   Preparation of academic texts

#### **Intercultural Communication**

- Different concepts of culture and approaches to the phenomenon of "culture"
- Raising awareness of intercultural issues and international cultural standards
- Using the example of two international, ethnographic approaches (Kluckhohn and Hall) and two business-related studies (Hofstede and Trompenaars), students will work with the more fundamental dimensions of international cultural comparisons
- Methods and problems of self perception and perception of others
- Specific characteristics of global cultures and value systems in companies and other institutions (organisational cultures)

#### **Forms of Teaching**

Active seminars with a focus on interaction, activity-based group and individual work, use of digital media.

#### **Requirements for Participation**

Formal: None

**Content:** Level B2 (or equivalent) of the Common European Framework of Reference for Languages (CEFR).

#### Form(s) of Examination

An examination graded as "passed" or "failed". More details in section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

Not planned.

#### Weighted Factor for the Final Grade

N/A

#### Module Coordinator (underlined) and Full-Time Lecturers

# 3 3rd Semester Modules

- Business Psychology 1
- Business Psychology 2
- Methodology 3 (see section 8: Cross-Semester Modules)
   Business & Economic Sciences 3

# 3.1 Business Psychology 1: Market, Advertising and Consumer Psychology, Financial Psychology

Title of the Module									
Business Psychology 1									
Module Num- ber	Workload	Credits	Study Se- mester	Frequency Every semester	Duration				
3.1	240 h	8	3rd semester	,	1 semester				
Course(s)			Contact Time	Self-Study	Planned Group Size				
Market, Advertising and Consumer Psychology Financial Psychology			3 SWS/45 h 3 SWS/45 h	75 h 75 h	70 students 70 students				

#### **Learning Outcomes**

#### Market, Advertising and Consumer Psychology

Students are able to describe consumers' purchase decision behaviour and reproduce the fundamental constructs. During this process, they can categorise and compare different psychological models and theories. Furthermore, students are able to classify purchase decisions according to their type and phase. The classification into pre-purchase, purchase and post-purchase phases is particularly important in this respect. Students are able to transfer findings in the field of advertising and consumer psychology to the issues and situations of a business and to illustrate relevant aspects of brand identity and positioning.

#### **Financial Psychology**

Students can categorise, describe, present and illustrate heuristics, decision anomalies and the principles of decision-making theory. They are able to transfer the findings to a variety of relevant applications of financial behaviour (e.g. saving, tax, investment and donation behaviour), to explain this behaviour and to resolve corresponding problems. In this context, they make use of the relevant scientific literature and can call it into question, draw conclusions from it and shed critical light on it.

#### **Topics**

#### Market, Advertising and Consumer Psychology

- Purchase decision behaviour
- Concepts and measurement of psychological explanatory constructs (activating and cognitive constructs)
- Personal, social and cultural determinants
- Types of purchase decisions
- Phases of purchase decisions
- Advertising psychology

#### **Financial Psychology**

- Decision theories
- Judgement heuristics and decision anomalies in financial decision-making
- Security, risk and ambiguity
- The perception of money
- Tax behaviour and tax morality

# Hochschule Bonn-Rhein-Sieg

Department of Management Sciences Rheinbach Campus

University of Applied Sciences

- Saving, debt, pensions
- Investor behaviour
- Financial competence
- Donation behaviour

#### Forms of Teaching

Seminars, lectures, group discussions, presentations, question sessions, case studies, self-study.

#### **Requirements for Participation**

Formal: None

**Content:** Knowledge of the content of the modules Principles of Psychology 1, 2 and 3.

#### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

Not planned.

#### **Weighted Factor for the Final Grade**

5%

# 3.2 Business Psychology 2: Work and Organisational Psychology, Personnel Psychology

Title of the Module Business Psychology 2									
3.2	270 h	9	3rd semester		1 semester				
Course(s)			Contact Time	Self-Study	Planned Group Size				
Work and Organisational Psychology Personnel Psychology			4 SWS/60 h 3 SWS/45 h	90 h 75 h	70 students 70 students				

#### **Learning Outcomes**

#### **Work and Organisational Psychology**

Students can explain the features of an increasingly flexible, digitalised world of work and identify the current challenges for work and organisational psychology. They should be able to explain and evaluate measures for structuring work on the basis of their knowledge of history and movements in work psychology and against the background of current developments in the world of work. They can confidently make use of work analysis procedures and interpret and assess the results professionally. They can apply the findings of the action regulation theory, stress research and research into group work as part of interventions in the context of work and the organisation.

They can understand the design of current organisational forms and models and identify the advantages, disadvantages and opportunities of organisational development. They can describe which factors and processes result in the attraction and adaptation of members of an organisation and of organisations. They acquire knowledge of psychological processes in conventional and virtual work teams and can analyse and optimise them systematically. Students can evaluate solutions for practical problems and also develop them independently on the basis of central theories on the satisfaction and motivation of members of an organisation.

#### **Personnel Psychology**

Students are able to explain the fundamental theories of personnel psychology. They understand that human resources are a business asset. They learn about the importance and implementation of sound work and requirements analyses for a variety of processes in personnel psychology. They can reflect on the use and benefits of human resource marketing measures, in particular online recruitment, and explain the impact of the relevant influencing factors. Students also understand the findings of research into the choice of profession and into professional development and human resource development. They can explain a number of selected approaches and procedures and are able to implement and evaluate them. Depending on the situation, they can use a variety of aptitude test procedures for recruitment purposes and compare their advantages and disadvantages. In this context, they can identify and categorise the benefits and problems of online recruitment and the use of artificial intelligence in recruitment processes.

#### **Topics**

#### **Work and Organisational Psychology**

History of work and organisational psychology

# Hochschule Bonn-Rhein-Sieg

Department of Management Sciences Rheinbach Campus

University of Applied Sciences

- Digitalisation of the world of work
- Action regulation
- Work analysis
- Design of working activities
- Stress and health
- Organisational gravitation and socialisation
- Group and team processes in organisations
- Motivation and satisfaction of the members of organisations

## 3.3 Methodology 3 (Part 1)

This is the Statistics 2 course. See the description of cross-semester modules in section 8.

## 3.4 Business & Economic Sciences 3: Ethics, Labour Law, Commercial, Company and Marketing Law

Title of the Module								
□Business & Economic Sciences 3								
Module Num-	Workload	Credits	Study Se-	Frequency	Duration			
ber			mester	Every semester				
	240 h	8	3rd semester		1 semester			
3.4								
Course(s)		Contact Time	Self-Study	Planned Group Size				
Ethics			2 SWS/30 h	30 h	70 students			
Labour Law			2 SWS/30 h	60 h	70 students			
Commercial, Company and Marketing Law			2 SWS/30 h	60 h	70 students			

## **Learning Outcomes**

#### **Ethics**

Students can take ethical requirements, principles and standards into consideration in their private, academic and professional activities. They are encouraged to reflect on the ethical principles of their thinking and the ethical consequences of their actions in order to develop their faculty of judgement. They can evaluate different ethical positions and compare them with one another. They are able to analyse and assess decisions on the basis of ethical principles and standards and are encouraged and enabled to conduct themselves in such a way in their future career that they do not violate or interfere with the personal space, freedom or dignity of other people. In addition, they can assess how ethical decisions affect society and how they arise.

### **Labour Law**

After completing the module, students can interpret and apply the text of legislation and other legal sources. They can assess and evaluate the differing interests of employees and employers. They can resolve simple labour law cases by applying the methods for managing legal cases. In this context, they can apply the most important provisions of labour law that are relevant to the world of business. They can prepare and/or assess employment contracts for use in business.

## **Commercial, Company and Marketing Law**

After completing the module, students can interpret and apply the text of legislation and other legal sources. Students can assess and evaluate the differing interests of companies and their business partners. They can resolve simple business and marketing legal cases by using the methods for managing legal cases. In this context, they can apply the most important provisions of commercial, company and marketing law that are relevant to the world of business. They can prepare and/or assess business contracts for use in business. They can identify and assess different forms of business organisation and recommend the appropriate form of company for individual business configurations. Students can assess the liability risks for companies and their representatives in the context of corporate law and can act accordingly. Working with the case studies enables students to assess and apply factors relating to trademark and advertising legislation in a business context.

**Ethics** 

## Hochschule Bonn-Rhein-Sieg

Department of Management Sciences Rheinbach Campus

University of Applied Sciences

- History and objectives of ethics
- Ethical principles
- Ethical theories and positions
- Monitoring ethical principles and rules in scientific and practical contexts
- Ethics and corporate culture
- Ethics and sustainability
- Ethics and corporate social responsibility
- Ethical aspects of digitalisation
- Ethics in advertising
- Case studies
- Case analyses

#### **Labour Law**

- In-depth evaluation of the methods of managing legal cases
- Legal interpretation and application of the provisions of employment legislation
- Legal and ethical perspectives of the employee/employer relationship
- Initiating and justifying the employment relationship
- Rights and obligations of the contractual parties
- Consequences of breaches of obligations
- Terminating the employment relationship, in particular dismissal
- Protection against dismissal
- International references in labour law
- Basic principles of the right of co-determination and collective bargaining law

## **Commercial Law and Corporate Law**

- Methods of managing legal cases
- Legal interpretation and application of the provisions of commercial legislation
- The concept of the merchant
- Agents of the merchant (power of procuration, commercial authority)
- Consequences of joining a company or of a change in the form of business
- Commercial register; special regulations for commercial transactions
- Partnerships and corporations (advantages and disadvantages of different forms of business, foundation and liquidation)

## **Marketing Law**

- Basic concepts of trademark law
- Types of trademarks
- Rights of trademark owners and consequences of violations of trademark law
- Introduction to the Act against Unfair Competition (UWG)
- Comparative and misleading advertising in specific cases
- Legal measures against competitors/countermeasures
- Complaints by public bodies
- The precise content and focus of the module is decided by the lecturers.

## **Forms of Teaching**

## **Ethics**

Seminars.

#### Labour Law and Commercial, Company and Marketing Law

Selection: seminars, blended learning, group work with case studies.

Department of Management Sciences Rheinbach Campus

## **Requirements for Participation**

None

## Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

**Use of the Module** (in other degree programmes)

Not planned.

## **Weighted Factor for the Final Grade**

5%

## **Module Coordinator (underlined) and Full-Time Lecturers**

Prof. Dr. M. Rieve-Nagel, Andrea Mannebeck

## Other Information

Literature:

#### **Ethics**

Course(s)			Contact Time	Self-Study	Planned Group Size
Consumer Behav	viour		4 SWS/60 h	Total:	Max. 40 stu-
Current Market I	Research Topics		2 SWS/30 h	360 h	dents
Customer-Centric Product Management			2 SWS/30 h		
Games and Decisions			2 SWS/30 h		
Innovation Management			2 SWS/30 h		

#### **Learning Outcomes**

Students can identify and describe theories, concepts and methods of market, advertising and financial psychology and explain their importance and use in business practice. They can confidently and correctly make use of qualitative and quantitative methods of market and consumer research. In addition, students can apply, categorise and evaluate theories of perception, decision-making and consumer experience and behaviour when analysing purchase decisions and consumer decisions. They can incorporate the relevant empirical literature into the process, evaluate it critically and draw the appropriate conclusions in relation to practical issues.

Students are able to apply scientific findings from psychological research to the design of advertising campaigns, communication strategies, points of sale and digital interfaces and to substantiate their interventions. They have the necessary methodological knowledge to evaluate these measures objectively. Furthermore, they are able to assess the ethical aspects of customer manipulation and advertising in the measures they are taking and to ensure that they can apply and justify ethical standards.

#### **Topics**

#### **Consumer Behaviour**

- Methods of user-centric development and design of products and services
- The user experience at digital and non-digital contact points

<sup>\*</sup> The department reserves the right to make changes. Details can be found in the examination regulations for the Bachelor's degree programme in Business Psychology.

Department of Management Sciences Rheinbach Campus

- Concepts for empirical survey designs using different qualitative and quantitative methods to answer application-related questions
- Implementation of empirical practical projects, e.g. using target group and user surveys, observations, market and competitor analyses and evaluations. Preparing and presenting the results

## **Current Market Research Topics**

- Psychological processes of information processing
- Attention and advertising
- Product perception and evaluation
- Communication and persuasion
- Design of advertising material, impact of advertising
- Online marketing
- Information and interaction at the point of sale
- Sustainable consumption

## **Customer-Centric Product Management**

- Supply and demand
- The customer experience as a differentiating feature
- Customer loyalty as a key performance indicator
- Customer management in an omni-channel context

#### **Games and Decisions**

- In-depth evaluation of the principles of decision theory
- Game theory
- Experimental decision-making games with economic links

## **Innovation Management**

- Phases of the innovation process
- Innovation, imitation, invention
- Dimensions of innovation
- Customer integration
- Risks and resistance

## Forms of Teaching

Lectures with discussions, seminars, group work, presentations, self-study, question sessions.

## **Requirements for Participation**

Formal: None

**Content:** Knowledge of the content of the modules Principles of Psychology 1, 2 and 3 and Business Psychology 1.

## Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

**Use of the Module** (in other degree programmes)

Department of Management Sciences Rheinbach Campus

Not planned.

## **Weighted Factor for the Final Grade**

10%

## Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. B. Krahn, Prof. Dr. Alexander Pohl, M.-C. Nimmerfroh (lecturer with special duties (LfbA))

## Title of the Module

Business Psychology 3: Specialisation – Personnel and Organisational Psychology

Module Num- ber	Workload	Credits	Study Se- mester	Frequency Every semester	Duration
4.1	540 h	18	4th semester		1 semester
Course(s)			Contact Time	Self-Study	Planned Group Size
Finding the Right	Finding the Right Career			Total:	Max. 40 stu-
Work and Health	)		2 SWS/30 h	360 h	dents
Staff Developme	nt and Coaching		3 SWS/45 h		
Recruitment Con	sultancy in Pract	ice	1 SWS/15 h		
Leadership and Communication			2 SWS/30 h		
Current Topics of Personnel and Organisational Psychology			2 SWS/30 h		

## **Learning Outcomes**

Students can adjust their job preferences to the opportunities available in the work environment and are able to gain an idea of possible career prospects.

They are able to name and identify typical organisational, social and task-based stress factors in work contexts and to improve and develop the resources and coping skills of employees by making targeted interventions. Discussing special features of target groups and industries enables them to carry out a critical evaluation of different processes and to draw conclusions about possible improvements and individual support methods.

Furthermore, students are able to develop and implement specific methods of staff development and to understand and use procedures to ensure that this knowledge is transferred. They can independently analyse typical problems (and their causes) in the coaching process. They can describe and apply different coaching tools and identify typical problems involved in the use of these tools.

Students become familiar with the recruitment process from the perspective of consulting companies. They understand customers' requirements and job profiles. They are able to evaluate application documents on the basis of specified criteria and to decide whether candidates are a good match for an advertised position. Students can hold job interviews for a particular position and recommend to the customer the actions to be taken until the position is filled.

Furthermore, students acquire the skills to analyse communication issues in organisations. They can conduct employee appraisals and negotiations. They also have the ability to manage conflicts by using the appropriate techniques. Students are able to explain different empirical management theories, to evaluate them against the background of an increasingly digitalised working world and to apply these theories in practice together with methods for training leaders.

Students are familiar with current topics of personnel and organisational psychology from research and practical settings. They are able to explain the different topics independently and shed light on the contexts of justification.

## **Topics**

## **Finding the Right Career**

- Classic professional fields in work, personnel and organisational psychology
- Larger work, personnel and organisational psychology projects in practice
- Industry- and organisation-specific work content
- Typical career paths with a focus on work, personnel and organisational psychology

#### **Work and Health**

- Job satisfaction and motivation
- Work and health the effects of work
- Stress and stress factors in a work context
- Resources and interventions for meeting the requirements of work
- Proactive job design
- Work-related health promotion measures specific to certain industries, target groups and professional groups
- Work and emotion

## **Staff Development and Coaching**

- Introduction to staff development
- Process of staff development
- Methods of staff development
- Introduction to coaching
- Structure of a coaching process
- Differentiation from psychotherapy
- Coaching goals and treatment concepts

## **Recruitment Consultancy in Practice**

- Analysing customers and their requirements
- Drawing up a job profile and a list of criteria
- Analysis of possible search strategies
- Analysis and assessment of application documents
- Preparing for and holding job interviews
- Evaluating the interview process

## **Leadership and Communication**

- Classical leadership theories
- New leadership theories and approaches
- Current topics in leadership research (e.g. gender or automation)
- Leadership development
- Communicative situations in organizations (e.g. employee interviews, negotiation skills)

## **Current Topics of Personnel and Organisational Psychology**

• The topics change depending on their relevance and importance

## **Forms of Teaching**

Lectures with discussions, seminars, home study of literature, presentations, poster design and presentations, practical classes, role plays, group work, demonstration experiments, tests, developing interview guidelines, science journalism, use of new forms of teaching and learning, i.e. goal and activity-oriented, (inter)active, situative and independent learning.

#### **Requirements for Participation**

Formal: None

Department of Management Sciences Rheinbach Campus

**Content:** Knowledge of the content of the modules Principles of Psychology 1, 2 and 3 and Business Psychology 2 as well as the modules Methodology 1, 2 and 3.

## Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

**Use of the Module** (in other degree programmes)

Not planned.

## **Weighted Factor for the Final Grade**

10%

## Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. P. Muck, Prof. Dr. P. Ianiro-Dahm, Prof. Dr. C. Syrek, Andreas Ley, Maxi Dietzsch, Alina Gerke

## 4.2 Methodology 3 (Part 2)

This is the course on SPSS statistical software. See the description of cross-semester modules in section 8.

## 4.3 Business & Economic Sciences 4: Accounting, Financial Management

Title of the Module							
Business & Economic Sciences 4							
Module Num- ber	Workload	Credits	Study Se- mester	Frequency Every semester	Duration		
4.3	240 h	8	4th semester		1 semester		
Course(s)			Contact Time	Self-Study	Planned Group Size		
Accounting Financial Management			4 SWS/60 h 2 SWS/30 h	90 h 60 h	70 students 70 students		

## **Learning Outcomes**

## **Accounting**

Students can describe the structure of individual accounting instruments and explain their roles and objectives. They understand the principles of bookkeeping and can complete bookkeeping tasks.

Students acquire knowledge of financial accounting (approach, disclosure and evaluation) on the basis of the regulations of the German Commercial Code (HGB), which enables them to identify balance sheet issues and options for structuring balance sheets and to resolve these issues. As a result, they can act as competent contacts, e.g. for company employees or auditors. Students can describe the corresponding problems and the proposed solutions in writing and verbally.

Students become familiar with management accounting as a system of sub-accounts that are coordinated with and based on one another. They are able to explain how cost type, cost centre and cost unit accounting interact and to identify their importance for business decision-making processes with a focus on effective cost management.

They can use their knowledge to apply the methods and instruments independently and to carry out a critical analysis and evaluation of calculations they are presented with.

## **Financial Management**

Students become familiar with the fundamental topics relating to finance. They understand them and can apply them to practical questions. The focus is on the use of the various forms of financing and the differences between them. Students can assess the advantages of individual forms of finance on the basis of financial criteria. In the context of financial analysis, students evaluate the most important financial key performance indicators and can interpret and assess them.

#### **Accounting**

- Concept, function and areas of accounting
- Beneficiaries of the accounting process and their information requirements
- Bookkeeping and annual accounts
- Basic concepts of accounting
- Principles of correct bookkeeping
- Components of annual accounts
- Approach, disclosure and valuation of selected assets
- Approach, disclosure and valuation of selected liabilities

Department of Management Sciences Rheinbach Campus

- Profit and loss account
- Management accounting as part of business accounting
- Cost type, cost centre and cost unit accounting
- Direct cost accounting

## **Financial Management**

- Basic financial questions
- Financial objectives and decision-making criteria
- Approaches to systematising different forms of finance
- Contributions and participatory financing
- Credit financing
- Financial analysis

The precise content and focus of the module is decided by the lecturers.

## **Forms of Teaching**

## **Accounting**

Seminars, group work, practical exercises.

## **Financial Management**

Seminars, group work, practical exercises.

## **Requirements for Participation**

Formal: None

**Content:** Knowledge of the content of the courses Principles of Business Administration and Business Mathematics.

## Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Use of the Module** (in other degree programmes)

Not planned.

## **Weighted Factor for the Final Grade**

5%

## Module Coordinator (underlined) and Full-Time Lecturers

## 5 5th Semester Modules

- Methodology 4Methodology 5
- Business & Economic Sciences 5: Specialisation

University of Applied Sciences

## 5.1 Methodology 4: **Advanced Studies in Diagnostics, Evaluation**

Title of the Module								
Methodology 4								
Module Num- ber	Workload	Credits	Study Se- mester	Frequency Every semester	Duration			
5.1	180	6	5th semester		1 semester			
Course(s)		Contact Time	Self-Study	Planned Group Size				
Advanced Studies in Diagnostics Evaluation			2 SWS/30 h 2 SWS/30 h	60 h 60 h	70 students 70 students			

## **Learning Outcomes**

## **Advanced Studies in Diagnostics**

Students repeat the principles of the diagnostic process and the diagnostic procedures. In particular, they demonstrate and compare important test procedures, but also diagnostic interviews and behavioural observation, in relation to applications and examples. Students can name and identify psychological test procedures for different applications. They can outline their main features and categorise and compare their theoretical principles and backgrounds. By applying the procedures in practice, they can use and evaluate the tests, analyse the results and draw the appropriate conclusions.

#### **Evaluation**

Students can name the basic concepts and features of evaluation and distinguish between them and related theories and approaches, e.g. from the field of business administration. They can draw up outline evaluation concepts for specific application issues and assess evaluation programmes on the basis of quality criteria and standards. In addition, they can demonstrate the contexts in which psychological evaluation research is used and applied, identify the policy implications and subject them to critical scrutiny. They can describe and substantiate the importance of ecologically valid evaluation in different contexts.

## **Topics**

## **Advanced Studies in Diagnostics**

- In-depth assessment of the principles of psychological diagnostics and the diagnostic process
- Identification of the applications within business psychology
- Selected procedures for psychological performance and personality diagnostics
- Scientific and practical criteria for assessing, selecting and applying procedures
- Application scenarios and case studies

#### **Evaluation**

- Scope of the concept of evaluation
- Distinguishing evaluation from related approaches
- Evaluation models
- Systematising evaluations on the basis of times, targets etc.
- Framework and practical implications of planning and implementing evaluations

Department of Management Sciences Rheinbach Campus

#### Case studies

## **Forms of Teaching**

Seminars, lectures, group work, presentations, question sessions.

## **Requirements for Participation**

Formal: None

**Content:** Knowledge of the content of the modules Methodology 1, 2 and 3.

## Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Use of the Module** (in other degree programmes)

Not planned.

## **Weighted Factor for the Final Grade**

4%

## **Module Coordinator (underlined) and Full-Time Lecturers**

Prof. Dr. B. Krahn

## Other Information

## Hochschule Bonn-Rhein-Sieg

University of Applied Sciences

## 5.2 Methodology 5: Experimental Training Course

Title of the Module							
Methodology 5							
Module Num- ber	Workload	Credits	Study Se- mester	Frequency Every semester	Duration		
5.2	180	6	5th semester		1 semester		
Course(s)		Contact Time	Self-Study	Planned Group Size			
Experimental Training Course			4 SWS/60 h	120 h	70 students		

## **Learning Outcomes**

Students can investigate and summarise the status of research concerning a particular business or psychological question. On the basis of the research status, they are able to formulate their own research question and to design and perform an appropriate (online) experiment in small groups to answer the research question. They can analyse the results of the experiment using appropriate statistical procedures and interpret the findings. Furthermore, they have the ability to summarise their study in a research report, to critically reflect on their analysis and to formulate open-ended questions for further research.

## **Topics**

- Defining the initial question accurately
- Literature search in psychological databases
- Description of the status of research into the given topic
- Formulation of hypotheses
- Preparation and planning of the experimental set-up
- Running the experiment
- Evaluating and preparing the data
- Presenting and discussing the results in relation to the hypotheses and the initial question
- Preparation of a research report on the basis of the manuscript guidelines of the German Psychological Society (DGPs)
- Dealing with test subjects and research data

## **Forms of Teaching**

Practical experiment.

## **Requirements for Participation**

Formal: None

**Content:** Knowledge of the content of the modules Methodology 1, 2 and 3.

## Form(s) of Examination

An examination graded as "passed" or "failed". More details in section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Department of Management Sciences Rheinbach Campus

Passing the examination in accordance with section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

**Use of the Module** (in other degree programmes)

Not planned.

## Weighted Factor for the Final Grade

N/A

## Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. C. Massen

## 5.3 Business & Economic Sciences 5: Specialisation

## **Elective subject**

## Generally\* you can choose from the following specialisations:

## Rheinbach Campus:

- Accounting and Controlling
- Bank and Finance Management
- Business Administration for Trading Companies
- International Management
- Marketing
- Sales Management
- Business Consulting and Development

## Sankt Augustin Campus:

- Controlling
- Economics
- Finance/Financial Services
- Health Management
- International Financial Management
- Logistics and Supply Chain Management
- Marketing, especially Business to Business
- Sustainable Management
- Human Resource Management
- Financial Reporting/Taxation/Auditing
- **Business Informatics**

Note: Each of the specialisations is presented in a separate table.

<sup>\*</sup> The department reserves the right to make changes. Details can be found in the examination regulations for the Bachelor's degree programme in Business Psychology.

## **Title of the Module**

Business & Economic Sciences 5: Specialisation – Accounting and Controlling (Rheinbach Campus)

Module Number	Workload	Credits	Study Semes- ter	<b>Frequency</b> Every semester	Duration
5.3	540 h	18	5th semester		1 semester
Course(s)	Course(s)			Self-Study	Planned Group Size
	4/5 SWS: International Financial Reporting Standards for International Financial Statements			Total: 360 h	Max. 30 stu- dents
4 SWS: Control	ling				
2 SWS: Deployment and Management of External Accounting and Controlling Service Providers					
	ed Seminar: Curre Inting/Controlling	•			

## **Learning Outcomes**

## **International Financial Reporting Standards**

Students understand corporate financial reporting. They are able to draw up a commercial balance sheet II and III independently and can identify the necessary consolidation steps and take the corresponding consolidation measures. In addition, they are familiar with the options and discretionary powers available and can evaluate them according to their effects on the analysis of international financial statements.

Students are familiar with selected regulations from the International Financial Reporting Standards and the differences between them and the regulations of the German Commercial Code (HGB) and can apply them to practical problems.

## Controlling

In the fundamental part of the course, students learn about the historical development of controlling up to the present day. The new challenges facing controllers as a result of digitalisation and predictive analytics, which require them also to be data scientists, are explained. Students can identify the organisational structure and the scientific theory of controlling, can position controlling in the strategic management process and explain the different concepts of controlling.

They are able to apply the central instruments of strategic and operational controlling independently and to assess them critically. They can use key performance indicators, cost management methods and performance measurement concepts independently and calculate them using sample figures. In the context of financial controlling, this includes economic value added (EVA) and value driver trees and, in production controlling, the concept of overall equipment effectiveness (OEE).

## Deployment and Management of External Accounting and Controlling Service Providers

Students can identify and distinguish the working methods and the management of external accounting and controlling service providers. They can outline the structures of the relevant market and characterise the market segments and the players, together with their specific strengths and weaknesses, methods and cultural features using examples. They can critically assess the different business models and competition structures in different market segments and compare them.

Department of Management Sciences Rheinbach Campus

In addition, students can categorise the challenges faced by external accounting and controlling service providers in the light of digitalisation, on the one hand, in supporting their clients and, on the other, in their own business with the digitalisation of auditing and consulting processes and the auditing or certification of digital processes (e.g. based on blockchain technology).

Students analyse the impact of digitalisation on the business of accounting and controlling service providers independently using the scenario analysis method, subject this to critical scrutiny and decide on courses of action for the market players.

## Advanced Seminar: Current Developments in Financial Accounting/Controlling

Students learn to identify current developments in financial accounting independently and to link them with the latest research and corresponding literature. They are able to process research results scientifically and draw appropriate conclusions. Depending on the situation, students become familiar with the relevant aspects of the digitalisation of accounting.

## **Topics**

## **International Financial Reporting Standards**

- Principles of international financial statements and corporate law
- Financial statements: obligation and consolidated companies
- Measures involved in full consolidation (capital, debt, cost and earning consolidation, elimination of intermediate results)
- At-equity accounting
- Financial statements in accordance with the IFRS: principles, approach, disclosure, evaluation

## Controlling

- Fundamental concepts of controlling
- Controlling as a management philosophy, challenges as a data scientist
- Principles of operational and strategic controlling
- Operational and strategic planning and control processes; budgeting
- Principles of variance analysis
- KPI-driven management of companies
- Principles and instruments of cost management
- Selected aspects of financial controlling
- Selected aspects of performance controlling
- Selected aspects of production and staff controlling

## **Deployment and Management of External Accounting and Controlling Service Providers**

- Introduction to the market
- Presentation of analysis methodology
- Macroanalysis/microanalysis
- Nightmare competitors
- Courses of action

## Advanced Seminar: Current Developments in Financial Accounting/Controlling

- Principles of scientific work
- Identification of current developments in financial accounting/controlling in relation to the latest research
- Discussion and presentation of an exposé and the research results

The courses include the content listed above. The precise content and focus of the module is decided by the lecturers.

Department of Management Sciences Rheinbach Campus

## Forms of Teaching

Seminars, case studies, individual and group work, workshops/teaching and supervision, self-study.

## **Requirements for Participation**

A thorough knowledge of the accounting regulations of the German Commercial Code (HGB) relating to annual accounts on the level of the Financial Accounting course (Business Administration degree programme) or the Accounting module (Business Psychology degree programme) is required.

## Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management degree programme.

## **Weighted Factor for the Final Grade**

10%

## **Module Coordinator (underlined) and Full-Time Lecturers**

Prof. Dr. Klaus Deimel, Prof. Dr. Dietmar Fink, Prof. Dr. Thomas Heupel (FOM), Prof. Dr. Wilhelm Schneider (tax consultant)

## Other Information

Literature:

Details of the literature will be provided at the start of lectures.

## Title of the Module

Business & Economic Sciences 5: Specialisation – Bank and Finance Management (Rheinbach Campus)

Module Num- ber	Workload	Credits	Study Se- mester	Frequency Only in the	Duration
5.3	540 h	18	5th semester	winter semes- ter	1 semester
Course(s)			Contact Time	Self-Study	Planned Group Size
4 SWS: Bank Ma	4 SWS: Bank Management			Total:	Max. 30 stu-
2 SWS: Manager	ment of Financial	Risks		360 h	dents
2 SWS: Analysis	of Business Custo	omers			
2 SWS: Business Policy of Banks					
2 SWS: Special Bank and Finance Management Topics					

## **Learning Outcomes**

Students are familiar with the principles of bank and finance management. The focus is on bank management (banking supervision law, banking oversight), the business policy of banks and the areas of due diligence and management of financial risks. Students are acquainted with the perspective of the banks and of the banks' corporate customers. This means that they are prepared in particular for specialist careers in financial institutions, finance and risk management departments of industrial and trading firms and accounting and auditing companies. Depending on the situation, students also understand the relevant aspects of digitalisation, internationalisation and sustainability and can discuss them critically.

## **Topics**

## **Bank Management and Business Policy of Banks**

- Legal, economic and, in particular, monetary frameworks
- Bank cost and revenue accounting
- Target system of the banking business with the fundamental conflict between profitability, liquidity, security and growth.
- Connection between the target system and the business units of a bank
- Lending and deposit business, taking into consideration capital requirements
- Commission-based and issuing business
- Own security deposits with hedging via put options
- Foreign currency investments and management of currency risks
- Bank controlling (market rate method)
- Analysis of target groups and competitors
- Development of marketing measures
- Digital business models of banks and fintechs

## **Management of Financial Risks**

- Importance and legal bases of risk management
- Process and organisation of risk management
- Management of financial risks with derivatives (includes principles and common features of derivatives, swaps, forwards, futures and options and principles of credit derivatives)

Department of Management Sciences Rheinbach Campus

## **Analysis of Business Customers**

- Reasons for credit institutions to analyse business customers
  - Credit checks
  - Check of eligibility for stock market listing
  - Due diligence/rating
- Principles of accounts analysis
- Quantitative and qualitative analysis of selected companies

## **Special Bank and Finance Management Topics**

- Preparation of supervised assignments on current topics of bank and finance management. The specific focus is on digitalisation, sustainability and corporate social responsibility of banks and finance companies.
- Detailed presentation and discussion of the assignments
- Guest presentations
- Trips

The precise content and focus of the module is decided by the lecturers.

## **Forms of Teaching**

Seminars, individual and group work, business simulation game, case studies, self-study.

## **Requirements for Participation**

Formal: None

**Content:** Content of the Finance course

## Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management degree programme.

## **Weighted Factor for the Final Grade**

10%

## Module Coordinator (underlined) and Full-Time Lecturers

## Title of the Module

Business & Economic Sciences 5: Specialisation – Business Administration for Trading Companies (Rheinbach Campus)

Module Num- ber	Workload	Credits	Study Se- mester	Frequency	Duration
5.3	540 h	18	5th semester	Every semester	1 semester
Course(s)			Contact Time	Self-Study	Planned Group Size
Strategy				Total:	Max. 40 stu-
Procurement			3 SWS/45 h	345 h	dents
Supply Chain Ma	anagement/Logi:	stics	3 SWS/45 h		
Sales Special Topics			3 SWS/45 h		
			3 SWS/45 h		
Special Topics			1 SWS/15 h		
			1		

## **Learning Outcomes**

Students gain an understanding of the key frameworks for strategic decision-making, the fundamental and central problems of logistics, sales and procurement and the less crucial areas of activity. They can identify them in practice and analyse their influence.

## **Topics**

## Strategy

- Strategy: approaches and roles in the company
- Types of business: concepts of business creation, core problems and decision-making processes during development
- Organisation: principles, specific forms of trade companies, decentralisation/centralisation, merchandising, category management, examples
- Location: core problems and decision-making processes

### **Procurement**

- Introduction
- Scope and structure of product range (concept, courses of action)
- Brand policy
- Retail branding
- Price policy (basic principles), price attractiveness, price level, price determination
- Category management (basic concept), best practice model, secondary components, strategy as a main component
- Eight-phase model as a main component
- Nine-phase model

## **Supply Chain Management/Logistics**

- Basic concepts, concepts of drop shipping and central delivery
- Infrastructure: distribution centre, transport, pallet
- RFID (radio frequency identification)
- Process organisation

Department of Management Sciences Rheinbach Campus

Modern concepts

#### **Sales**

- Role of sales, advertising: framework for action
- Advertising: targets, budgeting, message, management
- Sales: concept, framework for action, making contacts, sales outlet design, personal sales
- Customer service: concept, content, providers

## **Special Topics**

• Case studies from the specialist press (e.g. magazine for the consumer goods industry)

## Forms of Teaching

Seminars, individual and group work, company visits, brief visits to sales outlets of relevant retailers, case studies, self-study.

## **Requirements for Participation**

None

## Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management degree programme.

## Weighted Factor for the Final Grade

10%

## Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. Dr. Thomas Roeb

## Title of the Module

Business & Economic Sciences 5: Specialisation – International Management (Rheinbach Campus)

Module Num- ber	Workload	Credits	Study Se- mester	<b>Frequency</b> Every semester	Duration
5.3	540 h	18	5th semester	,	1 semester
Course(s) (in Eng	Course(s) (in English)			Self-Study	Planned Group Size
3 SWS: Internation	3 SWS: International Strategy, Organisation and Leadership			Total: 345 h	Max. 40 stu- dents
3 SWS: Internation	onal Marketing				
2 SWS: Internation	2 SWS: International Trade, Finance and Investment				
2 SWS: Projects and Case Studies in International Management					
3 SWS: Current Is ment	ssues in Internati	onal Manage-			

## **Learning Outcomes**

The aim of the courses International Strategy, Organisation and Leadership, International Marketing and International Trade, Finance and Investment is to broaden and deepen students' understanding and knowledge. Students should be able to name and describe key theories from the three areas referred to above. At the end of the module, they can explain the concepts, models and processes involved in internationalising companies. Case studies are used to practise the application of the theories.

Students practise the use and transfer of knowledge in the Projects and Case Studies in International Management course. They can resolve real business problems and plan and apply internationalisation strategies using instruments such as case studies from real management situations and international business simulation games.

The Current Issues in International Management course enables students to develop scientific methods further and apply them in innovative ways. They prepare scientific assignments independently, which involves assessing current scientific results from literature, analysing data they have collected themselves and assessing the usability of the data. The results are evaluated on the basis of ethical and sustainability standards.

Students are able to explain and discuss complex issues in English. They also acquire intercultural skills by working in teams of international students, both in person and using digital communication.

## **Topics**

## International Strategy, Organisation and Leadership

- Current international corporate strategies
- Country analysis, market entry strategies and entry modes, timing strategies, market entry barriers
- Corporate strategy systems
- International corporate organisation models
- Influence of cultures and intercultural communication in international organisations
- International corporate HR organisation and HR strategies
- International recruitment, training and assignment

Department of Management Sciences Rheinbach Campus

- Intercultural leadership and management development
- International trade union and works council policy

## **International Marketing**

- The scope, challenges and innovative trends of international marketing
- International market research, planning process and strategies
- International marketing mix
  - o Products and services for international consumer/business markets
  - o International distribution channels and sales management
  - o International marketing communication
  - o Pricing for international markets

## **International Trade, Finance and Investment**

- Development and current trends in international trade
- Theories of international trade and investment
- Regional economic integration
- The international finance system
- The role of international organisations and NGOs

## **Projects and Case Studies in International Management**

- Success factors of international corporations
- Analysis and presentation of real-life case studies and projects
- International business simulation game

## **Current Issues in International Management**

- Introduction to topics
- Lectures: Research methods
- Submission of final project outline and draft report structure
- Team consultation session with instructor
- Presentations: Intermediate presentation, final results

The precise content and focus of the module is decided by the lecturers.

## **Forms of Teaching**

Seminars, group and individual work, case studies, presentations, self-study, "International marketing in three countries" trip, workshops with experts over several days, group coaching, online "international management" simulation game, participation in internal and external international events and conferences, guest speakers.

## **Requirements for Participation**

None

## Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management (B.Sc.) and International Business (B.Sc.) degree programmes.

Department of Management Sciences Rheinbach Campus

## Weighted Factor for the Final Grade

10%

## Module Coordinator (underlined) and Full-Time Lecturers

Dr. Luc Da Gbadji, Prof. Dr. Jürgen Bode, Joyce Treptow

## Other Information

Literature:

Details of the literature will be provided at the start of lectures.

## Title of the Module

Business & Economic Sciences 5: Specialisation – Marketing (Rheinbach Campus)

Module Num- ber	Workload	Credits	Study Se- mester	Frequency Every semester	Duration
5.3	540 h	18	5th semester	, , , , , , , , , , , , , , , , , , , ,	1 semester
Courses			Contact Time	Self-Study	Planned Group Size
Marketing / Brand Management Current Topics in Marketing Market Research Marketing-Mix 1: Product (Innovation Management)			5 SWS / 75 h 2 SWS / 30 h 2 SWS / 30 h 2 SWS / 30 h	Total: 345 h	max. 30 Stu- dents
Marketing-Mix 2: Communication (e.g., Advertisement, Social Media Marketing)			2 SWS / 30 h		

## **Learning Outcomes**

Students ...

- understand the idea of marketing and the role of marketing and can communicate and argue in a professional manner,
- have dealt with various marketing terms and theories as well as their relevance for practice and have critically reflected upon them,
- know the market research methods and study designs used in the consumer goods industry and can evaluate their significance and usefulness,
- are able to develop a marketing concept including the relevant strategic planning instruments and the possibilities of designing a marketing mix
- are familiar with the basics of brand management, the management of brand portfolios, the design of brand architectures and know how brand management is changing in the digital age,
- are aware of the challenges facing brand managers today (e.g. internationalization, digitalization and the sustainability debate),

and are well prepared for entry-level positions in the consumer goods industry, e.g. in brand management.

#### **Topics**

## **Marketing / Brand Management**

- Concept, development and framework of marketing
- Theoretical approaches / "schools of thought" in marketing
- Planning instruments and decision-making in strategic marketing
- Composition of the marketing instruments / marketing mix (product and programme policy, price policy, communication policy, distribution policy)
- Brand management and brand strategies
- Digital brand management
- Management of brand portfolios
- Brand architectures

Department of Management Sciences Rheinbach Campus

• Practice of brand management - insight into a consumer goods company (different thematic focuses (e.g. strategy, communication, social media marketing, new product development)

## **Current Topics in Marketing**

- Presentations and papers on current marketing topics
- Presentations and discussion of current marketing topics from journals and periodicals
- Guest lecturers of practitioners on current issues from the marketing practice

#### **Market Research**

- Introduction to market research
- Fundamentals of theory of science and measurement theory
- Selection of the survey units / sampling
- Methods of data collection (interview, observation, experiments, panels)
- Selected methods of data analysis

## **Marketing-Mix 1: Product (Innovation Management)**

- Innovation management as part of product policy
- Definition and importance of product innovation (especially for FMCG)
- Success rate of product innovation
- Product Life Cycl
- Importance of market research
- Project management/project team
- Innovation Process
- Performance Review

## Marketing-Mix 2: Communication (e.g., Adver-tisement, Social Media Marketing ....) Social Media Marketing:

- Definition and development of social media marketing
- Concepts of social media marketing (consumer goods industry)
- Situation analysis
- Analysis of the market environment
- Development of a social media strategy
- Evaluation and monitoring

## Advertising:

- Basic concepts, framework conditions and current developments
- Strategic advertising planning
- Psychology of the advertising effect
- Design of advertising messages
- Selection and layout of the advertising media
- Advertising control

#### Forms of Teaching

Department of Management Sciences Rheinbach Campus

Seminars, lectures with discussions, group and individual work, case studies, project work, self-study, blended learning.

## **Requirements for Participation**

Formal: None

**Content:** Knowledge of the content of the courses Principles of Marketing

## Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

**Use of the Module** (in other degree programmes)

None

## **Weighted Factor for the Final Grade**

12%

## Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. E. Leischner, J. Sani

## **Other Information**

Literature:

Information about literature will be provided at the start of the semester.

## Title of the Module

Business & Economic Sciences 5: Specialisation – Sales Management (Rheinbach Campus)

Module Num- ber	Workload	Credits	Study Se- mester	Frequency	Duration
5.3	540 h	18	5th semester	Every semester	1 semester
Course(s)			Contact Time	Self-Study	Planned Group Size
Business Strategy				Total:	Max. 40 stu-
Consulting Process			4 SWS/60 h	360 h	dents
Management Trends			4 SWS/60 h		
			4 SWS/60 h		

## **Learning Outcomes**

## **Business Strategy**

Students acquire fundamental knowledge of the development strategies for businesses and groups of companies and can differentiate between them and identify specific problems. They can use portfolio management as an instrument for corporate development. Furthermore, they understand the fundamental concepts of the merger and acquisition process and can produce company valuations independently. They are familiar with the shareholder value concept as a key objective of listed companies and they can critically examine and apply this concept in the context of value-based management.

## **Consulting Process**

Students can explain the working methods and the management of external consultants on the basis of a typical consulting process, both from the client's view and from the internal perspective of a consultancy company. From the consultant's perspective, they can explain, evaluate and use the necessary instruments.

#### **Management Trends**

Students learn to identify and explain different management trends. They can compare the models with one another and explain why and how new management trends emerge, who contributes to the corresponding decisions, who benefits from this and why the trends disappear again after a certain period.

#### **Topics**

## **Business Strategy**

- Introduction to the field of corporate development
- Categorisation of corporate and business unit strategies in strategic management
- Principles of portfolio management, including case studies
- Mergers and acquisitions: basic principles and process development
- Procedures for valuing companies
- Principles and measurement methods of the shareholder value concept
- Value-oriented management

## **Consulting Process**

• Principles of business consulting

## Hochschule Bonn-Rhein-Sieg

### Title of the Module

Business & Economic Sciences 5: Specialisation – Business Consulting and Development (Rheinbach Campus)

Module Num- ber	Workload	Credits	Study Se- mester	<b>Frequency</b> Every semester	Duration
5.3	540 h	18	5th semester	every semiester	1 semester
Course(s)			Contact Time	Self-Study	Planned Group Size
2 SWS: Principles of Business Consulting 4 SWS: Methods and Tools of Business Consulting			12/13 SWS/180/195 h	Total: 360/345 h	Max. 40 stu- dents
4 SWS: The Cons 2/3 SWS: Manag	J				

### **Learning Outcomes**

## **Principles of Business Consulting**

Students can describe the structures and segments of the consulting market, the relevant players in these segments and the particular strengths and weaknesses of different players and characterise their methods and cultures using examples. They can also critically assess and compare the different business models and competitive structures in the various market segments. In addition, students can characterise the challenges faced by the consulting sector in the age of digitalisation. These relate, on the one hand, to the support needed by the sector's customers in managing the strategic and operational changes involved in digitalisation and, on the other, to the sector's own business with the digitalisation of consulting processes and the digital "packaging" of their intellectual capital in the form of digital consulting products. The first aspect forms the link to the course entitled The Consulting Process and the Methods and Tools of Business Consulting course.

### **Methods and Tools of Business Consulting**

Students can explain the differences between corporate and business unit strategies and their special features. They can differentiate between them and illustrate them on the basis of practical problems. They can reproduce and apply different consulting methods on a corporate and a business unit level, critically assess their suitability for different purposes from a business and a psychological perspective and, if necessary, modify the typical approaches to suit the situation and adjust them to individual circumstances. During this process, students are able to take a critical approach to the phenomenon of "seeming objectivity" and incorporate the differences and interactions between "pure doctrine" and "micropolitical reality" into their calculations. They also acquire the ability to develop individual methodological approaches independently and to tailor them to specific problems.

### **The Consulting Process**

Students can describe and explain the working methods and the management of external consultants on the basis of a typical consulting process, both from the client's view and from the internal perspective of a consultancy company. From the consultant's perspective, they can design awareness, contact and acquisition measures, structure projects, calculate project budgets, prepare quotations and draw up contracts. From the client's perspective, they can select suitable consultants for

Department of Management Sciences Rheinbach Campus

different circumstances, coordinate their deployment and critically evaluate the expected results of the consultants' work.

### **Management Trends**

Students can name different management trends and critically discuss the ideologies promoted by these trends. They can explain why and how new management trends emerge, who contributes to the corresponding decisions, who benefits from this and why the trends disappear again after a certain period. As a result, students can position current management trends, such as disruption and digitalisation, in a life cycle, assess their competitive and strategic potential, critically evaluate decisions to invest in the underlying measures and technologies and assess the resulting need for consulting.

### **Topics**

# **Principles of Business Consulting**

- Concept and nature of business consulting
- Forms of business consulting (specialist, expert, process and systemic consulting)
- The market and the competition (in Germany and globally)
- Market segments (in particular management, IT and HR consultancy)
- Business models (orientation/qualification/motivation, high margin business vs high-volume business, consulting pyramid etc.)
- Digitalisation of business models
- Digitalisation of consulting processes
- Players (companies and people)
- Schools of thought (in particular Anglo-American management schools)

### **Methods and Tools of Business Consulting**

- Introduction to the field of corporate development
- Categorisation of business unit strategies in strategic management
- Principles of portfolio management, including case studies
- Mergers and acquisitions: basic principles and process development
- Procedures for valuing companies
- Principles and measurement methods of the shareholder value concept
- Value-oriented management
- Introduction to the field of business development
- Categorisation of business unit strategies in strategic management
- Consulting methods for business development
- Developing methods for business consultancy

### The Phases of the Consulting Process

- Awareness
- Contact
- Acquisition
- Quotation
- Contract
- Project implementation
- Project follow-up
- Conversation techniques
- Pyramid principle and SCQA

# Hochschule Bonn-Rhein-Sieg

2 SWS: Manager mation System in	9	as an Infor-	13 SWS/195 h	345 h	dents
3 SWS: Strategic agement	and Operational	Cost Man-			
2 SWS: Controllin Indicators	2 SWS: Controlling Based on Key Performance Indicators				
2 SWS: Financial Controlling					
3 SWS: Case Stu	dies in Controllin	g			

### **Learning Outcomes**

This specialisation covers both the theoretical principles and the practical organisation of operational and strategic controlling within a business. Students study the objectives of controlling and the organisation of an enterprise controlling system on the basis of the key conceptual approaches of controlling. The course focuses on the design and implementation of processes and methods for the targeted planning, management and control of companies, the identification of strategic and operational decision-making data and the improvement of cost and process structures. Students discuss current developments in controlling, such as sustainability controlling and the impact of digitalisation on controlling processes and instruments. This enables them to understand the theoretical principles of controlling, to develop a controlling system and to use it in a practical business setting to resolve problems.

### **Topics**

## **System of Controlling**

- Controlling objectives
- Controlling concepts
- Controlling systems

### Management Accounting as an Information System in Controlling

- Management accounting as a service function of controlling
- Standard costing systems
- Management accounting as a comprehensive tool for cost management and controlling

### **Strategic and Operational Cost Management**

- Problems with traditional cost accounting
- Connections between cost accounting and cost management
- Influencing factors of strategic cost management
- Benchmarking in selected industries
- Product-based and process-based cost management

Department of Management Sciences Rheinbach Campus

- Operational cost management (lean management, Six Sigma etc.)
- Current trends in cost management including digitalisation and new organisational forms (e.g. agility and new work)

# **Controlling Based on Key Performance Indicators**

- Principles of controlling with key performance indicators
- Selected key performance indicators and KPI systems

### **Financial Controlling**

- Connections between balance sheets, income statements and financial statements
- Negative equity, illiquidity and excessive debt
- Principles of financial planning
- Cash management
- Capital commitment controlling with regard to working capital
- Long-term capital requirement and capital structure planning
- Aspects of internal and external financing with regard to the structural financial equilibrium
- Financial controlling as risk controlling and risk controlling in the financial sector

### **Case Studies in Controlling**

- Case studies concerning structural decisions in controlling (e.g. controlling process)
- Case studies on operational controlling (e.g. variance analysis, KPI analysis)
- Case studies on selected business decisions (e.g. target costing, investment controlling)

The precise content and focus of the module is decided by the lecturers.

### **Forms of Teaching**

Seminars, case studies, group work, self-study.

### **Requirements for Participation**

Formal: None

**Content:** Knowledge of the content of the Accounting and Finance Management courses.

### Form(s) of Examination

Written or oral examination (75%) and partial examination in conjunction with lectures in the form of a written paper (25%).

### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

# **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management degree programme.

# **Weighted Factor for the Final Grade**

10%

### Module Coordinator (underlined) and Full-Time Lecturers

<u>Prof. Dr. Andreas Wiesehahn</u>, Prof. Dr. Ralf Meyer, Prof. Dr. Max Leitterstorf, plus assistants and guest lecturers

### **Other Information**

Details of the literature will be provided at the start of lectures.

# Title of the Module

Business & Economic Sciences 5: Specialisation – Economics (Sankt Augustin Campus)

Module Num- ber	Workload	Credits	Study Se- mester	<b>Frequency</b> Every semester	Duration
	540 h	18	5th semester		1 semester
5.3					
Course(s)			Contact Time	Self-Study	Planned Group Size
Empirical Econom	ic Research			Total:	Max. 40 stu-
Green Economy a	nd Sustainable D	evelopment	3 SWS / 45 h	345 h	dents
International Econ	omic Relations I		2 SWS / 30 h		
International Econ	nomic Relations II		2 SWS / 30 h		
Macroeconomics					
Microeconomics II			2 SWS / 30 h		
include contonines in			2 SWS / 30 h		
				1	1

### **Learning Outcomes**

As part of the course "Empirical Economic Research", students gain an understanding of linear regression techniques with one or more regressors. They can also apply inference methods to test scientific hypotheses in the context of regression models.

In the course "Green Economy and Sustainable Development", students expand their knowledge of economic principles in the context of sustainable development. They deal with global social challenges and understand the political design process.

The course "International Economic Relations I" provides students with a deep understanding of concepts and empirical measurements of international development. They understand the role of imperfect markets and institutions, international trade and development co-operation.

In "International Economic Relations II", students acquire the ability to analyse the interaction between financial markets and real estate markets. They understand crises, regulation and speculative bubbles as well as the investment decisions of investors.

In "Macroeconomics II", students deepen their analytical skills by analysing foreign trade, direct investment, globalisation, protectionism, balances of payments, Target2 balances, foreign exchange markets and currency regimes.

In "Microeconomics II", students apply economic concepts to understand incentives for innovation, digital goods and services, pricing strategies, platforms and multi-sided markets and apply them to practice.

### **Topics**

### **Empirical economic research**

- Linear regression with one and more regressors
- Inference, i.e. the testing of scientific hypotheses in the regression model
- Simple non-linear models
- Model validation

### Green economy and sustainable development

- Economy and sustainable development
- Global societal challenges
- The political design process
- Natural resources
- Responsible economic activity

### **International Economic Relations I**

- International development: concepts and empirical measurement
- Income growth
- Imperfect Markets & Institutions
- International Trade
- Development Co-operation

#### International Economic Relations II

- Financial markets, property markets and their interaction
- Crises and regulation
- Speculative bubbles
- Investment decisions of investors

### **Macroeconomics II**

- Foreign trade vs. direct investment
- Globalisation vs. protectionism
- Balance of payments and Target2 balances
- Foreign exchange market and currency regime
- Transmission channels in open economies
- Monetary and fiscal policy with fixed and flexible exchange rates

## Microeconomics II

- Incentives for innovation (patents, property rights...)
- Digital goods and services
- Pricing strategies for digital goods
- Platforms and multi-sided markets
- Explanation of business models of tech companies

### Forms of Teaching

Seminars, group work, project work, presentations, self-study.

### **Requirements for Participation**

Formal: None

**Content:** Content of the Statistics 1 course and basic knowledge of macro- and microeconomics

### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Requirements for Awarding Credit Points**

Passing the written or oral examination and successful completion of a term paper or presentation (incl. preparation of a set of slides, a handout and presentation)

**Use of the Module** (in other degree programmes)

Department of Management Sciences Rheinbach Campus

The specialisation is also offered as part of the Business Management degree programme.

## **Weighted Factor for the Final Grade**

10%

## **Module Coordinator (underlined) and Full-Time Lecturers**

<u>Prof. Dr. Christian Tode</u>, Prof. Dr. Katja Bender, Prof. Dr. Thomas Deckers, Dr. E.-Peter Kausemann, Prof. Dr. Wiltrud Terlau, Prof. Dr. Michael Voigtländer

### **Other Information**

There is close cooperation with the German Economic Institute in Cologne and a close connection with the International Centre for Sustainable Development (IZNE) at Bonn-Rhein-Sieg University of Applied Sciences.

Details of the literature will be provided at the start of lectures.

# Hochschule Bonn-Rhein-Sieg

Department of Management Sciences Rheinbach Campus

University of Applied Sciences

### Title of the Module

Business & Economic Sciences 5: Specialisation – Finance/Financial Services (Sankt Augustin Campus)

Module Num- ber	Workload	Credits	Study Se- mester	<b>Frequency</b> Every semester	Duration
5.3	540 h	18	5th semester		1 semester
Course(s)			Contact Time	Self-Study	Planned Group Size
	2 SWS: Finance Management 2 SWS: Financial Analysis			Total: 345 h	Max. 40 stu- dents
4 SWS: Selected	Financial Service	S			
3 SWS: Stock Market and Financial Investment Decisions					
2 SWS: Financial	Planning and Co	ontrolling			

## **Learning Outcomes**

### **Finance Management**

Students learn to understand and resolve the practical financial management problems of small and medium-sized enterprises and listed companies independently and to describe them appropriately. The focus of the module is on detailed aspects of external and internal financing and issues of controlling in financial services from an internal company perspective.

## **Financial Analysis**

Students acquire the ability to evaluate annual accounts and to carry out a critical assessment of the suitability and the selection of instruments that represent an alternative to annual accounts with regard to their objective and practicability, from the perspective of a company's external investor. The focus is on the principles of balance sheets and, in particular, on possible voting rights and their impact on the external analysis and on more recent international developments.

#### **Selected Financial Services**

The module aims to provide market knowledge in the field of financial services. Students can characterise selected financial services on the basis of the product, provider, client, pricing, sales and current national and international trends and can also evaluate their potential applications in practice. The focus is on acquiring knowledge and skills that are important for a career in the product department and, in particular, in the sales department of a financial services company.

### **Stock Market and Financial Investment Decisions**

Students gain an understanding of the stock exchange as an institution and the ability to conduct market transactions and understand their institutional requirements. They can make independent decisions about the choice of suitable capital investments and portfolio structures and critically assess the evaluation criteria used. The module adopts the perspective of an external investor who is planning to buy and sell financial securities via the secondary market.

### **Financial Planning and Controlling**

Students learn how to plan, manage and control the cash flows and holdings of a company, taking into consideration the requirements of the capital market relating to financial management, in order to achieve and safeguard financial equilibrium within the company. They are able to classify the objectives and the tasks involved in financial planning and financial controlling and to select and use the tools needed for problem-solving independently on the basis of specialised reasoning.

**In all the courses**: Depending on the situation, students also understand aspects of digitalisation, internationalisation and sustainability and can discuss them critically (e.g. Robo-Advisory, digital support for the investment process, international diversification, ethical investment funds).

### **Topics**

### **Finance Management**

- Detailed aspects of external and internal financing
- Tax effects of financing
- Aspects of debt policy
- Shareholder value as a strategic approach to capital- and value-based corporate management
- Interest rate management
- Controlling of financial service providers using the example of investment portfolio controlling

### **Financial Analysis**

- Background to the analysis of annual accounts and to credit checks
- Analysis of asset and capital structure
- Static and dynamic liquidity analysis
- Performance analysis
- Analysis with KPI systems
- Cash flow statements and capital finance accounts
- Shareholder value approach as a link between financial analysis and capital budgeting

### **Selected Financial Services**

- Asset management
- Brokerage
- Research
- Domestic and global custody
- Insurance and finance
- Leasing
- Factoring and forfaiting
- Asset-backed financing

### **Stock Market and Financial Investment Decisions**

- Stock market
- Pricing on financial markets
- Theoretical and practical aspects of asset allocation
- Professional asset management
- Investment styles

# **Financial Planning and Controlling**

- Financial statements (cash flow statements)
- Objectives and tasks of financial management and controlling
- Avoiding illiquidity and debt overload as management goals
- Long-term capital requirement and capital structure planning
- Medium- and short-term financial planning and controlling
- Cash management/liquidity controlling
- Financial controlling of working capital
- Aspects of internal and external financing with regard to the structural financial equilibrium
- Financial controlling as risk controlling and risk controlling in the financial sector

The precise content and focus of the module is decided by the lecturers.

Department of Management Sciences Rheinbach Campus

# **Forms of Teaching**

Seminars, self-study, group work, Internet case studies.

## **Requirements for Participation**

Formal: None

**Content:** In-depth understanding of mathematics, interest in capital investment, more than a basic knowledge of finance and the preparation of balance sheets.

### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management degree programme.

# **Weighted Factor for the Final Grade**

10%

## Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. Wolfgang Doerks, Dr. Andreas Grünewald

# Other Information

Literature:

Details of the literature will be provided at the start of lectures.

# Title of the Module

Business & Economic Sciences 5: Specialisation – Health Management (Sankt Augustin Campus)

Module Number	Workload	Credits	Study Se- mester	Frequency Every semester	Duration
5.3	540 h	18	5th semester	Every semester	1 semester
Course(s)			Contact	Self-Study	Planned Group Size
3 SWS: Occupational Health Manage- ment			Time	Total:	Max. 40 students
1 SWS: Menta ment	1 SWS: Mental Health Risk Assess- ment			345 h	
1 SWS: Health	y Leadership				
3,5 SWS: Tool	3,5 SWS: Tools of SCOAP				
2,5 SWS: General Health Knowledge					
2 SWS: Practic	cal/Research Pro	ject			

### **Learning Outcomes**

Students have an in-depth knowledge of business health management. They understand its structures and organisation and are able to implement and establish them in a business context. In addition, they are able to lead and support employees on the basis of the SCOAP model. They are familiar with the requirements and with the necessary tools and techniques for making use of them in a company setting. Students have an awareness of health and manage their own health sustainably in order to strengthen their own health resources and promote the health of the employees. In addition, they have a general knowledge of health and can pass on information about health within the company.

### **Topics**

## **Business Health Management**

- Basics of Occupational Health Management
- Vision and strategy of an occupational health management system
- Practical implementation of occupational health management in the company
- Primary, secondary and tertiary prevention

### **Mental Health Risk Assessment**

### **Healthy Leadership**

- Principles of leadership
- Different models of "healthy leadership"
- Process model for implementing healthy leadership
- SCOAP for employee leadership

### **Tools of SCOAP**

- Self-management
- Working Environment 4.0 and New Work
- Communication
- Conflict management
- Subjective well-being

# **General Health Knowledge**

- Principles of anatomy and physiology
- Knowledge of central diagnostic and therapeutic measures
- Coaching methods
- Providers of health information within the company

### **Practical/Research Project**

• Analysis of a specific issue from companies with links to healthcare

# **Forms of Teaching**

Seminars, self-study, group work, project work.

## **Requirements for Participation**

Formal: None

**Content:** Interest in health issues.

### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management degree programme.

## **Weighted Factor for the Final Grade**

10%

### Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. T. Peters

Department of Management Sciences Rheinbach Campus

Department of Management Sciences Rheinbach Campus

### Title of the Module

Business & Economic Sciences 5: Specialisation – International Financial Management (Sankt Augustin Campus)

Module Num-	Workload	Credits	Study Se-	Frequency	Duration
<b>ber</b> 5.3	540 h	18	mester 5th semester	Summer semes- ter	1 semester
Course(s)	I		Contact Time	Self-Study	Planned Group Size
	4 SWS: International Financial Reporting Standards/Analysis of International Financial Statements		13 SWS/195 h	Total: 345 h	Max. 30 stu- dents
3 SWS: Managem ment Control	nent Accounting	and Manage-			
3 SWS: International Finance					
3 SWS: Case Studing and Managem		ent Account-			

### **Learning Outcomes**

# International Financial Reporting Standards/Analysis of International Financial Statements

Students understand international financial reporting standards (IFRS) and are familiar with the differences between the regulations of the German Commercial Code (HGB) and the US GAAP. In addition, they are familiar with the relevant options and discretionary powers and can evaluate them according to their effects on the analysis of international financial statements. Students also learn to identify and evaluate current developments in financial accounting independently – for example the use of automated methods in auditing – and to link them with the latest research and corresponding literature. They are able to process research results scientifically and draw appropriate conclusions.

## **Management Accounting and Management Control**

Students can explain the principles and the different concepts of controlling. They can also use the central instruments of operational controlling independently in an international context and assess them critically. They are familiar with the differences between controlling and management accounting. Students understand the changes in the role of a controller as a result of digitalisation. They can take into consideration the resulting consequences during their evaluation of a variety of different cases. They can name and assess the latest developments in international accounting.

### **International Finance**

Students are able to analyse the details and special features of financial markets and to develop solutions for finance issues from the perspective of a business. They understand the specific aspects of globalisation and can identify and analyse them from the perspective of international companies. Students are also familiar with the way in which the currency markets work and understand the relevant instruments for financing foreign trade.

### **Case Studies in Management Accounting and Management Control**

Students are able to apply the instruments of management accounting and controlling to real situations, interpret the results, make recommendations for action and defend the results in front of all the other students.

Department of Management Sciences Rheinbach Campus

### **Topics**

# International Financial Reporting Standards/Analysis of International Financial Statements

- Principles of financial statements and corporate law in an international context
- Financial statements: obligation and consolidated companies
- Consolidation (e.g. capital and debt consolidation, at-equity accounting, purchase price allocation, goodwill impairment test)
- Financial statements in accordance with the IFRS: principles, approach, disclosure, evaluation
- Analysis of annual accounts and KPIs
- Impact assessment of new accounting standards (e.g. IFRS 15 and IFRS 16)
- Identification of current developments in financial accounting in relation to the latest research
- Use of digital processes when drawing up and auditing annual accounts

## **Management Accounting and Management Control**

- Fundamental concepts of controlling
- Differences and common features of management accounting and controlling in an international context
- Principles of operational and strategic controlling
- Operational planning and control processes
- Principles of variance analysis
- KPI management of global companies
- Process cost accounting
- Principles and selected instruments of cost management, including special regional features
- Balanced scorecard
- Risk controlling and corporate governance
- Identification of current developments in management accounting in relation to the latest research

### **International Finance**

- The international finance system
- Currency theory and markets
- Financing international companies
- International investment
- Instruments for financing foreign trade
- Current developments in international finance markets including the impact of digitalisation (e.g. fintechs)

## **Case Studies in Management Accounting and Management Control**

- Controlling process
- Structural organisation of controlling
- Variance analysis
- Forecasting
- KPI analysis
- Process cost accounting
- Target costing
- Investment controlling

### Forms of Teaching

Lectures, seminars, digital learning, simulation, project work and group work.

## **Requirements for Participation**

Thorough knowledge of the principles of accounting, capital budgeting, controlling, corporate financing and international financial reporting. Also a good knowledge of English

Department of Management Sciences Rheinbach Campus

# Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

# **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management (B.Sc.) and International Business (B.Sc.) degree programmes.

# **Weighted Factor for the Final Grade**

10%

## **Module Coordinator (underlined) and Full-Time Lecturers**

Prof. Dr. Ralf Meyer, Prof. Dr. Andreas Wiesehahn and internal and external lecturers

#### Other Information

All courses are given only in English. Details of the literature will be provided at the start of lectures.

Department of Management Sciences Rheinbach Campus

# Title of the Module

Business & Economic Sciences 5: Specialisation – Logistics and Supply Chain Management (Sankt Augustin Campus:)

Module Num- ber	<b>Workload</b> 540 h	Credits	Study Se- mester 5th semester	<b>Frequency</b> Every semester	<b>Duration</b> 1 semester
5.3	340 11	10	Jui semester		i semester
Course(s)		Contact Time	Self-Study	Planned Group Size	
2 SWS: Logistics	Management			Total:	Max. 40 stu-
3 SWS: Procuren ment	ogistics Management Procurement and Production Manage-		13 SWS/195 h	345 h	dents
3 SWS: Inventory	/ Management				
2 SWS: Supply C	2 SWS: Supply Chain Management				
3 SWS: IT Suppo Chain Managem	•	nd Supply			

### **Learning Outcomes**

### **Cross-Disciplinary Areas**

Students learn the technical principles and, above all, the practical application and IT implementation of logistics concepts. The course also promotes teamwork and presentation skills by means of group interaction when working on case studies, simulation games and e-learning modules.

### **Logistics Management**

Students acquire an understanding of the importance of efficient logistics networks for the success of a business. They can name and explain different means of transport and network structures and their advantages and disadvantages. In addition, students learn to apply the principles of linear programming to logistics issues (such as location decisions, market and supplier allocations and route planning) so that they can perform a well-informed analysis and evaluation of them.

## **Inventory Management**

Inventory planning (and production planning) always begin with a forecast of demand. Students learn the concepts and techniques of demand forecasting in this module. Furthermore, they can name the reasons for and against inventories and classify batch sizes and minimum inventory levels. Students can determine the correct inventory amounts and recommend and quantify other measures to optimise inventory levels. Students also learn about the demand-driven model, an integrated model for network inventory planning. This has become a permanent part of business application systems as a result of digitalisation, which is so important for supply chain management.

### **Procurement and Production Management**

Students learn the necessary skills for selecting efficient suppliers, ensuring their loyalty and communicating with them. They are able to describe modern optimisation methods based on lean production and best practices, analyse production relationships and introduce improvements.

#### **Supply Chain Management**

Students gain an understanding of coherent international supply chains as a decisive factor in strategic competitiveness. They can apply segmenting techniques, which are essential in the age of big data, to different logistics issues. As part of the beer game, they learn about the bullwhip effect in a practical context and can identify suitable countermeasures for specific triggers, such as forms of

Department of Management Sciences Rheinbach Campus

cooperation. Finally, environmental sustainability is a key issue for supply chains and students learn to describe and evaluate it.

### **IT Support for Logistics and Supply Chain Management**

Students learn to use the information systems that play a key role in enabling them to implement modern logistics and supply chain management approaches. They understand the technical principles of designing and optimising logistics processes and supply chains that consist of a number of companies.

## **Topics**

### **Logistics Management**

- Means of transport
- Principles of linear programming
- Market and supplier allocation
- Logistics network structures
- Choice of location
- Route planning

### **Inventory Management**

- Demand forecast
- Costs and benefits of inventory management
- Batch size inventory
- Minimum inventory level
- Newsvendor model
- Measures to optimise the inventory in the network
- Demand-driven material requirements planning

### **Procurement and Production Management**

- Philosophy of procurement and production management
- Supplier development programmes
- Sourcing strategies
- Production planning and control
- Lean production
- KAIZEN
- Quality management
- The digital factory

# **Supply Chain Management**

- Supply chain strategy
- Strategy implementation via organisation, processes and KPIs
- Segmenting
- The bullwhip effect
- Forms of cooperation in the supply chain
- Sustainable supply chain management

## **IT Support for Logistics and Supply Chain Management**

- Introduction to the architecture and use of logistics and SCM systems
- IT-based logistics case studies
- IT-based modelling, analysis and simulation of supply chains

### **Forms of Teaching**

Seminars and group work using digital media.

Department of Management Sciences Rheinbach Campus

# **Requirements for Participation**

Formal: None

**Content:** Good knowledge of production and logistics

### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management degree programme.

## **Weighted Factor for the Final Grade**

10%

## **Module Coordinator (underlined) and Full-Time Lecturers**

<u>Prof. Dr. Robert Grüter</u>, Martin Christian Kemnitz (lecturer with special duties (LfbA))

#### Other Information

Literature:

Details of the literature will be provided at the start of lectures.

# Title of the Module

Business & Economic Sciences 5: Specialisation – Marketing, especially Business to Business (Sankt Augustin Campus)

Module Num- ber	Workload	Credits	Study Se- mester	Frequency Only in the	Duration
5.3	540 h	18	5th semester	summer se- mester	1 semester
Course(s)			Contact Time	Self-Study	Planned Group Size
Strategic Market Market Research Marketing Mana Innovation Mana Practical Project Project Managen	gement Control gement		4 SWS/60 h 1 SWS/15 h 2 SWS/30 h 1 SWS/15 h 4 SWS/60 h 1 SWS/15 h	Total: 345 h	Max. 40 students

## **Learning Outcomes**

Students learn to categorise and distinguish different marketing approaches. They can identify different marketing strategies and market research approaches, in particular in the context of B2B marketing and can configure the elements of the marketing mix in different ways. They are able to meet customer needs, satisfy market requirements and promote customer loyalty. In addition, students can evaluate market analysis methods as a prerequisite for strategic and operational marketing decisions and the system of marketing management control and of innovation management in marketing. As part of a practical project involving a real company, students are encouraged to make use of what they have learned.

## **Topics**

# **Strategic Marketing**

- Principles of marketing and marketing concepts
- International examples are used in the course.
- Special features of B2B marketing, when compared with consumer marketing
- Strategic marketing, in particular B2B
- Discussion of selected operational aspects of marketing

### **Market Research**

- Market research processes
- Data collection
- Applied statistics methods in data analysis
- Research into purchasing behaviour

### **Marketing Management Control**

- Principles and objectives
- Methodological approaches

Department of Management Sciences Rheinbach Campus

- Strategic approaches
- Task-based approaches
- Case studies relating to international companies
- Marketing mix-based approaches

### **Innovation Management**

- Innovation and uncertainty
- Product, process and business model innovation
- Creative techniques
- Internationalisation and digitalisation

### **Practical Project**

- Project management
- Market research methods (SPSS)
- Implementing and documenting the project independently, e.g. in relation to the following subjects:
  - Developing market entry strategies
  - o Measuring customer satisfaction
  - o Positioning innovative products on the market
  - o Repositioning products already on the market
- Presenting and discussing the results with the management team of the cooperating company

### **Project Management**

- Project organisation and processes
- Project management methods

### Forms of Teaching

Seminars, group work, project work.

### **Requirements for Participation**

Formal: None

**Content:** Appropriate knowledge from the basic courses

# Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

# **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management (B.Sc.) and International Business (B.Sc.) degree programmes.

### Title of the Module

Business & Economic Sciences 5: Specialisation – Sustainable Management (Sankt Augustin Campus)

Module Num- ber	Workload	Credits	Study Se- mester	<b>Frequency</b> Every semester	Duration
	540 h	18	5th semester	,	1 semester
5.3					
Course(s)		Contact Time	Self-Study	Planned Group Size	
2 SWS: Principles	s of Sustainable N	<i>M</i> anagement		Total:	Up to around
2 SWS: CSR Succ	cess Managemen	t	13 SWS/195 h	345 h	30 students
2 SWS: CSR Repo	orting				
2 SWS: CSR Risk	Management				
2 SWS: Operational CSR Management					
3 SWS: Practical	Project				
			1		L

### **Learning Outcomes**

In the module Principles of Sustainable Management, students learn to understand and discuss the political CSR reform process, the relevance of sustainable development at a corporate level and CSR as a dual success factor in the Society and Competitive Advantage modules.

In the CSR Success Management module, students learn to act as planners, implementers and communicators and to put into practice a successful CSR management programme on the basis of appropriate CSR success factors and potential, taking into account the special business features of CSR and the features of individual companies.

The CSR Reporting module focuses on the practical implementation of sustainability reports on the basis of national and international reporting guidelines. Against the background of statutory and mandatory regulations (e.g. CSR reporting obligation, National Action Plan on implementing the UN Guiding Principles on Business and Human Rights), students can design sustainability reports in the context of the different conditions in specific businesses, both for large organisations and for SMEs.

In the CSR Risk Management module, students learn on the basis of Internet benchmarking analyses to carry out comparative analyses of formal statutory risk management approaches and CSR risk management in global supply chains and to apply risk management methods to large companies and SMEs, taking into consideration the circumstances of the individual businesses.

The focus in the Operational CSR Management module is on the success of operational CSR management based on key figures and key performance indicators. Students can design workflows and processes, analyse relationships and structures, carry out calculations and make methodical use of the necessary tools for this purpose.

In the Practical Project module, the emphasis is on problem-solving skills on the basis of practical examples. Students demonstrate that they have understood what they have learned in larger structures by linking their learnings with new knowledge and applying them to individual companies in the context of transfer projects (e.g. psychology, human resources, controlling, logistics).

By presenting different perspectives and opinions in discussions, group work and the practical project, students develop their teamwork, communication and negotiation skills, their ability to compromise and their tolerance during their work on joint interdisciplinary solutions and strategies.

Department of Management Sciences Rheinbach Campus

The teaching and learning methods are used in such a way that students develop their learning ability and motivation, together with their self-management skills.

### **Topics**

### **Principles of Sustainable Management**

- 1. Sustainability: history and political framework
- 2. International guidelines and directives
- 3. International, European and national sustainability/CSR strategies

## **CSR Success Management**

- 1. Principles
- 2. CSR success management global, supranational and national perspectives
- 3. CSR success management business perspectives

### **CSR Reporting**

- 1. Principles
- 2. CSR reporting on the basis of international guidelines and directives
- 3. CSR reporting on the basis of the guidelines in the Global Reporting Initiative
- 4. CSR reporting on the basis of the reporting guidelines in the German Sustainability Code

### **CSR Risk Management**

- 1. Principles
- 2. CSR risk management versus formal risk management
- 3. CSR risk management based on international CSR codes of conduct
- 4. Risk management in accordance with the CSR Directive Implementation Act
- 5. Risk management on the basis of recognised reporting frameworks

## **Operational CSR Management**

- 1. Introduction and transfer into business and companies
- 2. Additional business concepts for operational CSR management
- 3. Instruments of operational CSR management

# **Practical Project (assignment in advance)**

The content is based on current practical questions and issues, e.g.

- 1. Life cycle assessments
- 2. CSR Directive Implementation Act
- 3. Sustainability reporting (in particular GRI-SRS, German Sustainability Code)
- 4. Transfer projects (e.g. psychology, human resources, controlling, logistics) with a focus on sustainability.

### **Forms of Teaching**

Seminars, case study methods in group work, practical project.

### **Requirements for Participation**

Successful participation in the course Scientific Writing and an interest in the content.

### Form(s) of Examination

Department of Management Sciences Rheinbach Campus

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

# **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

## **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management degree programme.

# **Weighted Factor for the Final Grade**

10%

### **Module Coordinator (underlined) and Full-Time Lecturers**

Prof. Dr. Rosemarie Stibbe

Course(s)			Contact Time	Self-Study	Planned Group Size
Human Resource Human Resource Communication Human Resource Employment and	e Systems and Leadership e Controlling		3 SWS/45 h 2 SWS/30 h 2 SWS/30 h 2 SWS/30 h 4 SWS/60 h	Total: 345 h	Max. 40 students

### **Learning Outcomes**

Students learn about the models, theories and systems required for strategic human resource development. As potential human resources specialists, they see themselves not as administrators of employees, but as developers and advisers. They are able to effectively assess the potential of staff as a company's most important asset and to develop employees using suitable training measures that are in line with the corporate strategy. In the context of human resource controlling, they can analyse the cost impact and the quality of the employees and therefore play a decisive role in the planning, management and coordination processes of a company. With regard to corporate management, students are familiar with the guidelines for positive interaction and transparent communication with employees. They have a greater capacity for reflection and they acquire a more in-depth knowledge of employment and social law.

### **Topics**

### **Human Resource Development**

- Scientific principles of human resource development
- Organisation of human resource development
- Instruments and methods
- Potential analysis processes
- Project on a current human resource management topic

### **Human Resource Systems**

- Organisation of work/semi-autonomous group work
- Optimisation systems for employee participation
- Visualisation in the business
- Balanced scorecard in human resources
- Evaluation systems
- Incentive and bonus systems

### **Communication and Leadership**

• Theoretical principles of communication

Department of Management Sciences Rheinbach Campus

- Leadership styles and role conflicts
- Social skills as a requirement for leadership

### **Human Resource Controlling**

- Definitions of human resource management and controlling
- 8-M 4-D model (definition of human resource controlling)
- Four dimensions of space and time
- Integration of the individual elements of the model of human resource controlling

### **Employment and Social Law**

- Right of dismissal, protection against dismissal
- Employer references
- Temporary and part-time working, marginal employment
- Codetermination in the workplace
- Deployment of staff abroad
- Social security system in Germany
- Principles of social security
- Employment promotion
- Principles of administrative and legal procedures

## **Forms of Teaching**

Seminars, self-study, group work, project work.

### **Requirements for Participation**

None

### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management degree programme.

# Weighted Factor for the Final Grade

10%

### Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. S. Lemke

3 SWS: Internation	onal Corporate 1	axation		3 13 11	
2 SWS: Auditing					
4 SWS: Balance S	Sheet Analysis ar	nd M&A			

### **Learning Outcomes**

### International Financial Reporting Standards (IFRS)/Corporate Financial Reporting

Students learn to draw up financial statements in accordance with the International Financial Reporting Standards (IFRS). The focus is on conveying the connection between the decisions made by the person drawing up the balance sheet and the preparation of the information from the IFRS financial statement. This requires a more in-depth understanding of the functioning of communication on the international capital markets. Not only financial statements but also sustainability reports are taken into consideration. As the IFRS are mandatory for listed companies in the EU, students should also be familiar with the fundamental methods of preparing annual accounts in accordance with the IFRS (consolidation).

## **International Corporate Taxation**

Students learn the principles of taxing international transactions on the basis of German national corporation tax law. The emphasis is on international double taxation and its avoidance, together with the group structure of global companies. Against this background, issues such as the fair taxation of international companies and the difficulty of taxing digital business models are discussed.

## **Auditing Annual Accounts**

Students can explain the theoretical and practical principles of auditing annual accounts on the basis of commercial law and can carry out an appropriate evaluation of individual audit statements, taking into consideration accounting regulations in particular. This is based on the risk-, process- and system-based auditing approach. In addition, students are familiar with the auditing profession and can explain the problems it involves.

# **Balance Sheet Analysis and M&A**

Students can describe the background of balance sheet analysis and analyse different or individual companies over time using specific key performance indicators. They gain a deeper understanding of the information they acquired during the Financial Accounting course by investigating a wide range of case studies. In addition, students can describe the background of M&A transactions and carry out company valuations using specific procedures and make a critical assessment of these procedures.

### **Topics**

### International Financial Reporting Standards/Corporate Financial Reporting

# Hochschule Bonn-Rhein-Sieg

Department of Management Sciences Rheinbach Campus

University of Applied Sciences

- Purposes of international financial reporting in accordance with the IFRS
- The IFRS framework
- Intangible assets/company value
- Financial instruments
- Fixed assets and leasing
- Stock levels and long-term contract manufacturing
- Deferred taxes
- Pension liabilities and other accruals
- Profit and loss account and other comprehensive income
- Cash flow and equity statement
- Duty of corporate financial reporting and differentiation of the consolidated companies
- Principles of consolidation
- Consolidation of other not fully consolidated companies
- Deferred tax and currency conversion in the consolidated financial statement
- Non-financial reporting (sustainability reporting)

### **International Corporate Taxation**

- Tax burden reports of national companies
- Taxation of national groups of affiliated companies/integrated groups of companies
- Hidden profit distribution and hidden contribution
- Cross-border transactions/double taxation
- Financing in groups of companies
- Transfer pricing and the External Tax Relations Act
- Taxation of international groups of companies
- Digital business models and tax equity

### **Auditing**

- Principles: tasks, phases, legal background
- Assessing management assertions
- The auditing profession

### **Balance Sheet Analysis and M&A**

- Balance sheet analysis
  - o Background
  - o Key performance indicators for the analysis (in particular performance and risk)
  - o Role of balance sheet policy
- M&A (mergers and acquisitions)
  - o Background of company takeovers
  - o Valuation methods (in particular DCF and multiples)
  - o Sum-of-the-parts analysis
  - o International transactions
- In-depth examples

In all the courses: Depending on the situation, students also understand aspects of digitalisation, internationalisation and sustainability and can discuss them critically (e.g. differences in financial reporting standards, challenges in international transactions).

The precise content and focus of the module is decided by the lecturers.

### Forms of Teaching

Seminars, self-study, group work, project work, presentations.

Department of Management Sciences Rheinbach Campus

### **Requirements for Participation**

Formal: None

**Content:** Principles of management and financial accounting and taxation

### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

### **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management degree programme.

## **Weighted Factor for the Final Grade**

10%

### Module Coordinator (underlined) and Full-Time Lecturers

<u>Prof. Dr. Norbert Seeger</u>, Prof. Dr. Max Leitterstorf, Torsten Janßen (auditor and tax consultant), Dr. Jan Sedemund, LL.M Taxation (USA)

### Other Information

Literature:

Details of the literature will be provided at the start of lectures.

### Title of the Module

Business & Economic Sciences 5: Specialisation – Business Informatics (Sankt Augustin Campus)

Module Num- ber	Workload	Credits	Study Se- mester	<b>Frequency</b> Every semester	Duration
	540 h	18	5th semester	Every serificater	1 semester
5.3					
Course(s)	Course(s)			Self-Study	Planned Group Size
2 SWS: Operation	nal Data Manag	ement		Total:	Max. 40 stu-
2 SWS: Object-Oriented Development of Business Application Systems Data Science Data Literacy			15 SWS/195 h	345 h	dents
2 SWS: Use of Bu ERP Systems	usiness Applicati	on Systems in			
2 SWS: Internet 8	Economics				
2 SWS: Content, Web and Knowledge Management					
3 SWS: Information and Business Process Management					
2 SWS: Data Ana	alytics and Devel	opment			

### **Learning Outcomes**

### **Operational Data Management**

Students learn about operational data management, which is a central task of business informatics. This involves designing database systems as the foundation for operational applications, with a focus on using recognised and innovative IT tools and methods. During the lectures, students learn, among other things, to use the database structures they have created in practical scenarios (e.g. training data for artificial intelligence systems).

#### **Data Literacy**

Analysing and optimising a company by using data to ensure its future viability is a decisive business factor in many industries and an important means of remaining competitive in the long term. Data literacy refers to the ability to manage data competently and is a key skill in the field of digitalisation. With the help of data science tools (including Tableau), students study the individual components of data literacy throughout the data science life cycle, in other words, collecting, modifying, analysing and interpreting data and presenting it in an appropriate visual form.

### **Use of ERP Systems**

Students acquire in-depth knowledge of the methodology and use of an enterprise resource system (ERP system) with a focus on primary value-added processes. They can explain the extent to which business applications fulfil a cross-disciplinary function in business informatics and can apply the accompanying interface knowledge to different industries.

### **Internet Economics**

Students learn about the changes in market structures that lie behind the terms "digital business models" and "platform economies". They discuss the new effects and impacts on digital markets. They can also explain the innovative approaches of digital markets in the context of the Internet

Department of Management Sciences Rheinbach Campus

economy and the success factors in managing information and communication technologies. Students learn to understand, analyse and evaluate innovative digital business models.

### **Data Science and Development**

Data science is normally defined as the methodology used to obtain usable findings from data. In many contexts, it is a generic term for earlier methods of data analysis, such as exploratory statistics, information visualisation, business intelligence and data mining. Data science is a discipline with an ambitious objective. It involves representing complex facts using data in order to provide new insights and validate convictions that can be used as the basis for decision-making. A critical data science-based approach does not replace intuition, best practices and qualitative methods, but instead attempts to supplement them. The course will give a general introduction to the programming language Python or R. In the second step, basic algorithmic processes will be introduced and applied in practice.

### **Content, Web and Knowledge Management**

Students become familiar with the rules and structures of web publishing that are necessary for the purposeful use of the intranet as the area where the three subjects in the course title intersect. They are able to use an individual implementation of a content management system (CMS) as a tool for managing unstructured information and to identify the new opportunities that it offers for knowledge management within a company. Primarily, they focus on the question of the extent to which new technologies can be used to give a new impetus to knowledge management.

### **Information and Business Process Management**

Students acquire useful knowledge relating to the management of information processing, in particular process management. They acquire in-depth knowledge of the fundamental concepts and the modelling languages with practical relevance for processes. They can model business processes on the basis of practical case studies using selected modelling tools (ARIS etc.) and languages (process mapping, eEPC, BPMN 2.0). They learn about the uses and architectures of workflow management systems (WFMS), robotic process automation (RPA) and process mining.

## **Topics**

### **Operational Data Management**

- Overview of operational data management
- Database administration
- Data modelling
- Data warehousing
- Organisation of data management

### **Data Literacy**

- Status quo and definition of concepts
- Value creation using data in companies
- Data-based decision-making in companies
- Data science projects and their management
- Data science teams and project roles
- Methods and tools for data analysis

### **Use of ERP Systems**

- Principles of using business application systems
- Architecture of an ERP system
- Use of an ERP system to support operational processes within a company
- Case studies: "sales processes", "procurement processes", "ordering processes"
- Customising an ERP system

#### **Internet Economics**

- Online economics platforms
- Principles of Internet economics
- Value creation in Internet economics

#### **Data Science and Development**

- Overview of the principles of object-oriented programming
- Introduction to Python or R
- Introduction to multivariate procedures
- Machine learning processes

#### **Content, Web and Knowledge Management**

- Initial situation and identification of concepts
- Web publishing
- Content management and content management systems (CMS)
- Intranet-based knowledge management

#### **Information and Business Process Management**

- Organisation of information management
- Introduction to process management
- Concepts of process management
- Roles and players in process management
- Methods of process modelling
- Tool-based process modelling (VCD/eEPC, BPMN 2.0)
- Process automation (workflow management systems, robotic process automation, process mining)
- Process controlling with key performance indicators
- Special issues and case studies (independent work)

The precise content and focus of the module is decided by the lecturers.

#### Forms of Teaching

Seminars, self-study, group work, project work, case studies, practical classes in the computer lab.

#### **Requirements for Participation**

Formal: None

**Content:** Basic knowledge of business informatics.

#### Form(s) of Examination

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

The specialisation is also offered as part of the Business Management degree programme.

#### **Weighted Factor for the Final Grade**

10%

Department of Management Sciences Rheinbach Campus

## 6 6th Semester Modules

Internship

### 6.1 Internship

Title of the Module							
Internship							
Module	Workload	Credits	Study Se-	Frequency	Duration		
Number			mester	Every semester			
	900 h	30	6th semester		1 semester		
6.1							
Course(s)			Contact Time	Self-Study	Planned Group Size		
No courses			N/A	900 h	N/A		

#### **Learning Outcomes**

By working in a company and being involved in the daily organisational and digital workflows, students become aware not only of issues of business psychology and business administration but also of the requirements of the world of work and the accompanying social and environmental issues. They can relate to these factors and this enables them to respond more flexibly to the requirements or problems they encounter in the world of work. Students who spend their internship abroad can develop their intercultural skills.

They become familiar with working life, apply the knowledge they have acquired during the course and their ability to perform specific tasks and, under supervision, help to resolve business psychology and business administration problems. Students evaluate and analyse their experiences in a report on their internship.

An internship in Germany or abroad strengthens the links between study and working life and improves students' employability.

#### **Topics**

The content and tasks depend on the employer and must be agreed with the employer in advance.

#### Forms of Teaching

Practical activities under supervision.

#### **Requirements for Participation**

**Formal**: Admission to the internship requires the completion of at least four semesters and the achievement of at least 70 ECTS points from examinations in accordance with section 15 paragraph 3 of the examination regulations.

**Content**: Knowledge of the content of the previously completed modules.

#### Form(s) of Examination

An examination graded as "passed" or "failed". More details in section 15 paragraph 4 in conjunction with section 12 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 4 in conjunction with section 12 of the examination regulations.

Department of Management Sciences Rheinbach Campus

#### **Use of the Module** (in other degree programmes)

The internship is also part of the Business Management and International Business degree programmes.

#### **Weighted Factor for the Final Grade**

N/A

#### **Module Coordinator and Full-Time Lecturers**

#### **Organisational**

A. Röbbert (coordinator of the internship in Rheinbach).

#### **Technical**

The supervisor from the department (authorised examiner from the teaching staff).

#### **Other Information**

Students can opt for a study semester abroad instead of a internship.

Department of Management Sciences Rheinbach Campus

## 7 7th Semester Modules

- Business Psychology 4Business Psychology 5
- Final Thesis
- Business & Economic Sciences 6

## 7.1 Business Psychology 4: **Elective Psychology, Advanced Studies in Psychology**

Elective Psychology: compulsory optional subject

Title of the Module Business Psychology 4							
7.1	180	6	7th semester		1 semester		
Course(s)			Contact Time	Self-Study	Planned Group Size		
Elective Psychology			2 SWS/30 h	60 h	25 students		
Advanced Studies in Psychology			2 SWS/30 h	60 h	70 students		

#### **Learning Outcomes**

#### **Elective Psychology**

Students acquire knowledge of selected topics on the boundaries of psychology. Depending on the elective subject they choose, students can describe the special subject and apply their knowledge in relation to the content of their previous studies. Focusing on a specific topic enables students to produce more in-depth analyses and to break down the topic into a detailed structure. By working with other students from different specialisations and subject areas, students can carry out interdisciplinary analyses of a selection of psychological phenomena.

#### **Advanced Studies in Psychology**

In the Advanced Studies in Psychology course, students study selected areas of basic psychological subjects in more depth. The selection of subjects depends on the current status of research and on their importance.

Current selection: Psychology of decision-making

Students can describe the basic principles and methods of psychological and interdisciplinary research into decision-making and the basic processes of decision-making analysis and learn to apply these methods in a practical business context.

#### **Topics**

#### **Elective Psychology**

Challenging topics from the field of psychology are covered, together with areas that complement these topics and cross-disciplinary subjects. Students can choose from a range of different elective subjects.

#### **Advanced Studies in Psychology**

Current selection: Psychology of decision-making

• Judgement, decision-making and problem-solving models

Department of Management Sciences Rheinbach Campus

- Processes and theories of decision-making
- Influencing factors in decision-making situations
- Applications of decision-making research

#### **Forms of Teaching**

#### **Elective Psychology**

Seminars with group work and presentations.

#### **Advanced Studies in Psychology**

Seminars, lectures, group discussions, group work, presentations, question sessions, case studies, self-study.

#### **Requirements for Participation**

Formal: None

**Content:** Knowledge of the content of the modules Principles of Psychology 1, 2 and 3.

#### Form(s) of Examination

An examination graded as "passed" or "failed". More details in section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

Not planned.

#### Weighted Factor for the Final Grade

N/A

#### Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. C. Syrek, A. Ley, Prof. Dr. P. Ianiro-Dahm, C. Kawa

#### **Other Information**

Literature:

#### **Elective Psychology**

Information about specific literature will be provided during the course.

#### **Advanced Studies in Psychology**

Tversky, A. & Kahneman, D. (1974). Judgment under Uncertainty. Heuristics and Biases. Science, 185 (4157), pp. 1124-1131.

Information about specific literature will be provided during the course.

## 7.2 Business Psychology 5: Participation in Experimental Studies, Research Colloquium

Title of the Module							
Business Psychology 5							
Module Num- ber	Workload	Credits	Study Semes- ter	Frequency Every semester	Duration		
7.2	180	6	Participation in Experimental Studies: as- signed to the 7th semester Research Col- loqium: 7th se- mester		Hours of Participation in Experimental Studies can be accumulated from the 1st semester onwards.		
					Research Collo- qium: 1 semes- ter		
Course(s)			Contact Time	Self-Study	Planned Group Size		
Participation in Experimental Studies (no course)			N/A	60 h	N/A		
Research Colloqu	uium		3 SWS/45 h	75 h	70 students		

#### **Learning Outcomes**

#### **Participation in Experimental Studies**

By taking part as test subjects in empirical (online) studies carried out by other members of the university (e.g. professors, lecturers, students working on their Bachelor's theses or as part of practical experience of experimental psychology), students can experience psychological studies from the perspective of the test person and obtain information relating to the planning and design of their own studies. In addition, they learn to identify limitations on the meaningfulness of psychological studies and to assess them critically. By comparing a variety of different studies, they acquire knowledge of the structure and the process involved in psychological investigations. The experience of being a test subject also enables them to identify the consequences of the ethical approach to test persons and data and to take these into account in their own experiments.

#### **Research Colloquium**

Students are able to take part in scientific discussions on psychological research problems and practical issues. They improve their knowledge of methodical thinking and are able to make competent judgements relating to processes in business psychology and apply research methods for investigating specific issues. They can use scientific arguments and make critical assessments of solutions for business psychology problems. They acquire practical communication and presentation skills relating to psychological experiments and their results and can integrate research-related and applied topics.

#### **Topics**

#### **Participation in Experimental Studies**

Department of Management Sciences Rheinbach Campus

Participation in empirical (online) studies.

#### **Research Colloquium**

Current research projects (in particular Bachelor's theses) are presented and discussed. Students working on their Bachelor's theses have the opportunity to discuss the theoretical approach, the issue, the planned method and the evaluation of their theses and to gather ideas for the practical implementation of their project.

#### **Forms of Teaching**

#### **Hours of Participation in Experimental Studies**

N/A

#### **Research Colloquium**

Seminar with group discussions and presentations, question session.

#### **Requirements for Participation**

Formal: None

#### **Research Colloquium**

**Content:** Knowledge of the content of the modules Methodology 1-5 and the module Principles of Scientific Writing & Presenting.

#### Form(s) of Examination

An examination graded as "passed" or "failed". More details in section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

Not planned.

#### **Weighted Factor for the Final Grade**

N/A

#### Module Coordinator (underlined) and Full-Time Lecturers

#### **Hours of Participation in Experimental Studies**

Prof. Dr. C. Massen

#### **Research Colloquium**

Prof. Dr. P. laniro-Dahm, Prof. Dr. B. Krahn, Prof. Dr. C. Syrek

#### Other Information

#### 7.3 Final Thesis

Title	of	the	Mod	ule

**Final Thesis** 

Module Num- ber	Workload	Credits	Study Se- mester	Frequency	Duration
7.3	360 h	12	7th semester	Every semester	1 semester
Course(s)			Contact	Self-Study	Planned
			Time	,	<b>Group Size</b>

#### **Learning Outcomes**

After completing the final thesis, students can independently prepare a practical assignment in their own subject area, including technical details and interdisciplinary connections, using scientific, subject-related methods, in a clear and professional way and within a specified period.

#### **Topics**

Challenging business psychology topics and cross-disciplinary subjects that complement the field of business psychology.

#### Forms of Teaching

N/A

#### **Requirements for Participation**

**Formal**: Admission to the final thesis requires the achievement of 140 ECTS points from the examinations in the 1st to 5th semesters in accordance with the schedule of courses in section 11 paragraphs 1 and 2 and in the annex of the examination regulations.

**Content:** Knowledge of the content of the previously completed modules.

#### Form(s) of Examination

Examination in accordance with section 15 paragraph 3 in conjunction with sections 19 to 22 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with sections 19 to 22 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

The final thesis is also part of the Business Management and International Business degree programmes.

#### Weighted Factor for the Final Grade

20%

#### **Module Coordinator and Full-Time Lecturers**

Department of Management Sciences Rheinbach Campus

First examiner of the final thesis. See section 19 paragraphs 2 and 3 in conjunction with section 7 of the examination regulations.

### Other Information

Students can write their thesis in cooperation with a company.

## 7.4 Business & Economic Sciences 6: Elective Business & Economic Sciences, Advanced Studies in Business & Economic Sciences

**Elective Business & Economic Sciences: compulsory optional subject** 

Title of the Module								
Business & Economic Sciences 6								
Module Num-	Workload	Credits	Study Se-	Frequency	Duration			
ber			mester	Every semester				
	180	6	7th semester		1 semester			
7.4								
Course(s)			Contact Time	Self-Study	Planned Group Size			
Elective Business	& Economic Sc	iences		60 h	25 students			
Advanced Studies in Business & Economic Sci-			2 SWS/30 h	30 h	35 students			
ences			4 SWS/60 h					

#### **Learning Outcomes**

#### **Elective Business & Economic Sciences**

Students acquire knowledge of selected topics on the boundaries of business administration. Depending on the elective subject they choose, students can describe the special subject and apply their knowledge in relation to the content of their previous studies. Focusing on a specific topic enables students to produce more in-depth analyses and to break down the topic into a detailed structure. By working with other students from different specialisations and subject areas, students can carry out interdisciplinary analyses of a selection of business administration phenomena.

#### Advanced Studies in Business & Economic Sciences (Simulation Game)

Students make use of the knowledge they have acquired about the different sub-disciplines of business administration and business psychology in the preceding semesters. They are able to apply this knowledge to a specific situation in a simulation game. Students analyse business connections and interactions and adapt decisions to changing circumstances by applying and linking together their knowledge of business administration and business psychology. Students are able to understand the consequences of decisions in the marketing, production, procurement, human resource, investment and finance departments. Students can make decisions in a team, question their effects and coordinate the decision-making process.

#### **Topics**

#### **Elective Business & Economic Sciences**

Challenging topics from the field of management sciences are covered, together with areas that complement these topics and cross-disciplinary subjects. Students can choose from a range of different elective subjects. The selection generally includes methodical and statistical subjects, subjects with specific links to software and subjects from related disciplines such as law. Subjects that reflect the latest trends, such as digitalisation, press analysis and entrepreneurship, are often added to the selection.

#### **Advanced Studies in Business & Economic Sciences (Simulation Game)**

The business simulation game is a complex, computer-based, industrial game that is based on the real market economy. Several companies manufacture and sell products according to their own strategy. Each student represents one company and must make several business decisions during the different rounds of the game. This is a highly practical way for students to prepare for their future careers and raises their awareness of the interdependencies between different disciplines.

- Introduction to the business simulation game
- Dividing the students into groups/companies
- Simulation and game phases in the groups, including situation analysis, market analysis and strategy development
- Discussions involving all the students about decisions and results
- Presenting the status of the work in a simulated roadshow, marketing campaign or annual general meeting

#### **Forms of Teaching**

#### **Elective Business & Economic Sciences**

Seminars with group work and presentations.

#### **Advanced Studies in Business & Economic Sciences (Simulation Game)**

Simulation game, group work, discussions among all the students.

#### **Requirements for Participation**

Formal: None

#### **Advanced Studies in Business & Economic Sciences (Simulation Game)**

**Content:** Knowledge of the content of the course Principles of Business Administration and the module Management Sciences 4.

#### Form(s) of Examination

An examination graded as "passed" or "failed". More details in section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Requirements for Awarding Credit Points**

Passing the examination in accordance with section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

The elective subjects in management sciences are also offered as part of the Business Management degree programme.

#### **Weighted Factor for the Final Grade**

N/A

#### Module Coordinator (underlined) and Full-Time Lecturers

<u>Prof. Dr. A. Pohl, Prof. Dr. T. Amely, lecturers from the Management Sciences department</u>

- TOPSIM General Management Participants' Manual Part II, Initial Situation, Version 13.1, Standard Scenario.
- TOPSIM General Management Participants' Manual Part III Brief Overview Introduction, Version 13.1, Standard Scenario.

#### Information about specific literature will be provided during the relevant course.

All the elective subjects from the Business Management degree programme are generally available as the Elective Business & Economic Sciences. Alternatively, a practical project from the Business Management degree programme will also be recognised as an Elective Business & Economic Sciences. Important considerations: The number of SWS and ECTS points from the practical project (4 SWS and 6 ECTS points) is not significant. Only the 2 SWS and 3 ECTS points from the Elective Business & Economic Sciences can be recognised.

Department of Management Sciences Rheinbach Campus

## **8 Cross-Semester Modules**

Methodology 3

## 8.1 Methodology 3: Statistics 2, SPSS

Title of the Module							
Methodology 3							
Module Num-	Workload	Credits	Study Se-	Frequency	Duration		
ber			mester	Every semester			
	270 h	9	3rd and 4th		2 semesters		
8.1			semester				
Course(s)			Contact Time	Self-Study	Planned Group Size		
Statistics 2 – in t	he 3rd semester			105 h	70 students		
SPSS – in the 4th			3 SWS/45 h	75 h	70 students		
וו נופ אנו	i serriester		3 SWS/45 h	7511	70 Students		

#### **Learning Outcomes**

#### Statistics 2

On the basis of the Statistics 1 course, students learn to explain and apply inferential statistics procedures that are important for psychological research. Students describe the theory and application of these procedures and are able to select the appropriate statistical methods for different types of experiment. They are also able to put these methods into practice and interpret the results correctly. Furthermore, students can carry out critical analyses and professional evaluations of scientific studies and popular science literature.

#### **SPSS**

Students can complete statistical evaluations with the SPSS statistics software. This includes describing and using the structure and user interface of the program. In addition, they are able to add and use different file types (e.g. data files, syntax files) in SPSS. They can also implement the most important quantitative and qualitative procedures for descriptive and inferential data analysis and interpret the output from the program appropriately. Furthermore, they can visualise and document the results of their analyses in a suitable way.

#### **Topics**

#### Statistics 2

- Principles of inferential statistics: probability distributions, p-values, effect size, power
- Procedures of inferential statistics: evaluating differential hypotheses (t-tests), analysis of frequencies (chi-squared tests), analysis of correlations and regressions
- Multivariate procedures: overview and systematic categorisation in detail: multiple regression, conjoint analysis, variance analysis

#### **SPSS**

- User interface and operation
- Logic and structure of the program
- Importing and exporting data
- Defining and structuring variables
- Descriptive and inferential statistical evaluation

Department of Management Sciences Rheinbach Campus

#### • Data output and presentation

#### **Forms of Teaching**

#### Statistics 2

Seminars, practical classes, lectures, group discussions, group work, presentations, question sessions, self-study.

#### **SPSS**

Computer-based instruction using the department's pool of PCs. The teaching is complemented by exercises and examples.

#### **Requirements for Participation**

Formal: None

**Content:** Knowledge of the content of the modules Methodology 1 and 2.

#### Form(s) of Examination

#### Statistics 2

Generally a written or oral examination. More details in section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **SPSS**

An examination graded as "passed" or "failed". More details in section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Requirements for Awarding Credit Points**

#### **Statistics 2**

Passing the examination in accordance with section 15 paragraph 3 in conjunction with section 17 of the examination regulations.

#### **SPSS**

Passing the examination in accordance with section 15 paragraph 4 in conjunction with section 18 of the examination regulations.

#### **Use of the Module** (in other degree programmes)

Not planned.

#### **Weighted Factor for the Final Grade**

5%

#### Module Coordinator (underlined) and Full-Time Lecturers

Prof. Dr. C. Buchholz, Prof. Dr. C. Syrek
